- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

Total Centrally Cleared Financial Derivative Instruments

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

OTC FINANCIAL DERIVATIVE INSTRUMENTS (amounts in thousands*, except number of contracts)

Total Centrally Cleared Financial Derivative Instruments

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

Total Centrally Cleared Financial Derivative Instruments

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

OTC FINANCIAL DERIVATIVE INSTRUMENTS (amounts in thousands*, except number of contracts)

* A zero balance may reflect actual amounts rounding to less than one thousand.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- μ All or a portion of this amount represents unfunded loan commitments. The interest rate for the unfunded portion will be determined at the time of funding. See Note 4, Securities and Other Investments, in the Notes to Financial Statements for more information regarding unfunded loan commitments.
- ^ Security is in default.
- (a) Security is an Interest Only ("IO") or IO Strip.
- (b) Principal only security.
- (c) Payment in-kind security.
- (d) Security did not produce income within the last twelve months.
- (e) Zero coupon security.
- (f) Coupon represents a yield to maturity.
- (g) Principal amount of security is adjusted for inflation.
- (h) Perpetual maturity; date shown, if applicable, represents next contractual call date.
- (i) Affiliated to the Fund.
- (j) Contingent convertible security.
- (k) Security sold short as at 31 December 2022 is covered by long portfolio investments in transferable securities and money market instruments.
- (I) Restricted Securities (31 December 2021: 0.91%):

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security did not produce income within the last twelve months.
- (b) Zero coupon security.
- (c) Coupon represents a yield to maturity.
- (d) Principal amount of security is adjusted for inflation.
- (e) Perpetual maturity; date shown, if applicable, represents next contractual call date.
- (f) Affiliated to the Fund.

Cash of \$5,919 (31 December 2021: \$2,100) has been pledged as collateral for exchange-traded and centrally cleared financial derivative instruments as at 31 December 2022.

Cash of \$2,260 (31 December 2021: \$260) has been pledged as collateral for financial derivative instruments as governed by International Swaps and Derivatives Association, Inc. master agreements as at 31 December 2022.

Fair Value Measurements(1)

The following is a summary of the fair valuations according to the inputs used as at 31 December 2022 in valuing the Fund's assets and liabilities:

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽³⁾ This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

OTC FINANCIAL DERIVATIVE INSTRUMENTS (amounts in thousands*, except number of contracts)

* A zero balance may reflect actual amounts rounding to less than one thousand.

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- μ All or a portion of this amount represents unfunded loan commitments. The interest rate for the unfunded portion will be determined at the time of funding. See Note 4, Securities and Other Investments, in the Notes to Financial Statements for more information regarding unfunded loan commitments.
- ^ Security is in default.
- (a) Security is an Interest Only ("IO") or IO Strip.
- (b) Payment in-kind security.
- (c) Security did not produce income within the last twelve months.
- (d) Zero coupon security.
- (e) Coupon represents a yield to maturity.
- (f) Principal amount of security is adjusted for inflation.

Schedule of Investments Low Duration Income Fund (Cont.)

- (g) Perpetual maturity; date shown, if applicable, represents next contractual call date.
- (h) Affiliated to the Fund.
- (i) Contingent convertible security.
- (j) Security sold short as at 31 December 2022 is covered by long portfolio investments in transferable securities and money market instruments.
- (k) Restricted Securities (31 December 2021: 0.10%):

Schedule of Investments Low Duration Opportunities Fund (Cont.)

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security is an Interest Only ("IO") or IO Strip.
- (b) Principal only security.
- (c) Zero coupon security.
- (d) Coupon represents a yield to maturity.
- (e) Principal amount of security is adjusted for inflation.
- (f) Affiliated to the Fund.
- (g) Securities sold short as at 31 December 2022 are covered by long portfolio investments in transferable securities and money market instruments.
- (h) Securities with an aggregate fair value of \$324,164 (31 December 2021: \$375,312) have been pledged as collateral under the terms of the Master Repurchase Agreements and/or Global Master Repurchase Agreements as at 31 December 2022.

Securities with an aggregate fair value of \$Nil (31 December 2021: \$94) and cash of \$4,656 (31 December 2021: \$Nil) has been received as collateral under the terms of the Master Repurchase Agreements and/or Global Master Repurchase Agreements as 31 December 2022.

Security with an aggregate fair value of \$Nil (31 December 2021: \$664) and cash of \$4,327 (31 December 2021: \$26,671) have been pledged as collateral for exchange-traded and centrally cleared financial derivative instruments as at 31 December 2022.

Cash of \$4,020 (31 December 2021: \$2,840) has been pledged as collateral for financial derivative instruments as governed by International Swaps and Derivatives Association, Inc. master agreements as at 31 December 2022.

Fair Value Measurements(1)

The following is a summary of the fair valuations according to the inputs used as at 31 December 2022 in valuing the Fund's assets and liabilities:

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽³⁾ This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

OTC FINANCIAL DERIVATIVE INSTRUMENTS (amounts in thousands*, except number of contracts)

* A zero balance may reflect actual amounts rounding to less than one thousand.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- μ All or a portion of this amount represents unfunded loan commitments. The interest rate for the unfunded portion will be determined at the time of funding.
- Security is in default.
- (a) Security is an Interest Only ("IO") or IO Strip.
- (b) Payment in-kind security.
- (c) Security did not produce income within the last twelve months.
- (d) Zero coupon security.
- (e) Coupon represents a yield to maturity.
- (f) Principal amount of security is adjusted for inflation.
- (g) Perpetual maturity; date shown, if applicable, represents next contractual call date.
- (h) Affiliated to the Fund.
- (i) Contingent convertible security.
- (j) Securities sold short as at 31 December 2022 are covered by long portfolio investments in transferable securities and money market instruments.
- (k) Restricted Securities (31 December 2021: 0.39%):

	Acquisition	Fair	% of

(1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

Schedule of Investments Total Return Bond Fund (cont.)

- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽¹⁾ Net exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. See Note 16, Financial Risks, in the Notes to Financial Statements for more information regarding credit and counterparty risk.

⁽¹⁾ See Note 3 in the Notes to Financial Statements for additional information.

⁽²⁾ Refer to the Schedule of Investments for additional information.

⁽³⁾ Financial Derivative Instruments may include open futures contracts, swap agreements, written options, purchased options and forward foreign currency contracts.

Comparative Information

The following is a summary of the comparative information for Schedule of Investments as at 31 December 2022:

	31-Dec-2022 (%)	31-Dec-2021 (%)
Transferable securities admitted to official stock exchange	66.92	66.72
Transferable securities dealt in on another regulated market	47.33	41.50
Other transferable securities	0.68	1.09
Investment funds	7.05	8.56
Repurchase agreements	4.12	0.14
Financial derivative instruments dealt in on a regulated market	0.86	0.28
Centrally cleared financial derivative instruments	(0.84)	0.12
OTC financial derivative instruments	0.08	(0.36)
Securities sold short	(1.65)	N/A
Reverse repurchase agreements	(0.04)	(4.57)
Sale-buyback financing transactions	(1.85)	N/A

The Fund's investment portfolio is concentrated in the following segments as at 31 December 2022:

Investments, at fair value	31-Dec-2022 (%)	31-Dec-2021 (%)
Corporate Bonds & Notes	36.37	48.35
Municipal Bonds & Notes	0.28	0.62
U.S. Government Agencies	37.34	19.94

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

Schedule of Investments US Investment Grade Corporate Bond Fund (Cont.)

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

OTC FINANCIAL DERIVATIVE INSTRUMENTS (amounts in thousands*, except number of contracts)

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security did not produce income within the last twelve months.
- (b) Zero coupon security.

- (c) Coupon represents a yield to maturity.
- (d) Perpetual maturity; date shown, if applicable, represents next contractual call date.
- (e) Affiliated to the Fund.
- (f) Contingent convertible security.
- (g) Restricted Securities (31 December 2021: 0.72%):

		Maturity	Acquisition		Fair	% of

(1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a

net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced

obligation or underlying securities comprising the referenced index.

(2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

NOTES TO SCHEDULE OF INVESTMENTS (amounts in thousands*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- Security is in default.
- (a) Security is an Interest Only ("IO") or IO Strip.
- (b) Zero coupon security.
- (c) Coupon represents a yield to maturity.
- (d) Affiliated to the Fund.
- (e) Restricted Securities (31 December 2021: 0.10%):

		Maturity	Acquisition		Fair	% of
Issuer Description	Coupon	Date	Date	Cost	Value	Net Assets
Citigroup, Inc.	5.850%	17/03/2026	10/03/2022	\$ 3,400	\$ 3,410	0.15
Deutsche Bank AG	0.898	28/05/2024	25/05/2021 - 31/03/2022	4,056	3,836	0.17
				\$ 7.456	\$ 7 246	0.32

Security with an aggregate fair value of \$Nil (31 December 2021: \$215,008) have been pledged as collateral under the terms of the Master Repurchase Agreements and/or Global Master Repurchase Agreements as at 31 December 2022.

Security with an aggregate fair value of \$Nil (31 December 2021: \$237,156) have been pledged or delivered as collateral for delayed delivery/or sale-buyback financing transactions as governed by Master Securities Forward Transaction Agreements as at 31 December 2022.

Cash of \$16,350 (31 December 2021: \$15,635) has been pledged as collateral for exchange-traded and centrally cleared financial derivative instruments as at 31 December 2022.

Security with an aggregate fair value of \$Nil (31 December 2021: \$281) and cash of \$1,780 (31 December 2021: \$3,950) have been pledged as collateral for financial derivative instruments as governed by International Swaps and Derivatives Association, Inc. master agreements as at 31 December 2022.

Fair Value Measurements(1)

The following is a summary of the fair valuations according to the inputs used as at 31 December 2022 in valuing the Fund's assets and liabilities:

Category ⁽²⁾	Quoted Prices in Active Markets for Identical Investments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Fair Value
Transferable Securities	\$ 0	\$ 1,891,711	\$ 0	\$ 1,891,711

1. GENERAL INFORMATION

Each of the funds (hereinafter referred to individually as a "Fund" and collectively as the "Funds") discussed in this report is a sub-fund of PIMCO Funds: Global Investors Series plc (the "Company"), an umbrella type openended investment company with variable capital and with segregated liability between Funds incorporated with limited liability in Ireland under the Companies Act 2014 with registration number 276928 and authorised by the Central Bank of Ireland (the "Central Bank") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "UCITS Regulations"). The Company is an umbrella type company consisting of different Funds each comprising one or more classes of shares. More than one class of shares ("Class") may, at the discretion of the Board of Directors (the "Board" or "Directors"), be issued in relation to a Fund. A separate portfolio of assets is maintained for each Fund and is invested in accordance with the investment objectives and policies applicable to such Fund. Additional Funds may be created from time to time by the Board with the prior written approval of the Central Bank. Additional Classes may be created from time to time by the Board in accordance with the requirements of the Central Bank. The Company was incorporated on 10 December 1997.

PIMCO Global Advisors (Ireland) Limited (the "Manager") is the manager to the Company.

As provided for in the Prospectus of the Company, Pacific Investment Management Company LLC, PIMCO Europe Ltd and PIMCO Europe GmbH (each an "Investment Advisor") have been appointed as investment advisor to various Funds of the Company. PIMCO Asia Limited and PIMCO Asia Pte Ltd. (each an investment advisor) are cleared by the Central Bank to act as an investment advisor to Irish funds.

In accordance with the Prospectus of the Company, each Investment Advisor may delegate the discretionary investment management of the Funds to one or more sub-investment advisors, subject to all applicable legal and regulatory requirements. Where an Investment Advisor is appointed to a specific Fund, the Investment Advisor has appointed each of the other Investment Advisors, PIMCO Asia Limited and PIMCO Asia Pte Ltd., as sub-investment advisor in respect of the particular Fund or Funds. The fees of each sub-investment advisor so appointed shall be paid by the Manager, or by the Investment Advisors on behalf of the Manager, from the Management fee.

The registered office of the Company is 78 Sir John Rogerson's Quay, Dublin 2, D02 HD32, Ireland.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies and estimation techniques adopted by the Company and applied in the preparation of these financial statements:

(a) Basis of Preparation

The financial statements are prepared in accordance with Financial Reporting Standard 102 ("FRS 102"), "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" issued by the Financial Reporting Council, the Companies Act 2014 and the UCITS Regulations. The financial statements are prepared on a going concern basis for all Funds.

The information required to be included in the Statement of Total Recognised Gains and Losses and a Reconciliation of Movements in Shareholders Funds, is, in the opinion of the Directors, contained in the Statement of Operations and the Statement of Changes in Net Assets.

The Company has availed of the exemption available to open-ended investment funds that hold a substantial proportion of highly liquid and fair valued investments under Section 7 of FRS 102 and is not presenting a cash flow statement.

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss.

The Company maintains separate accounts for each Fund. Shares are issued by the Company and allocated to whichever Fund is selected by the shareholder.

The proceeds of issue and the income arising thereon are credited to each Class of each Fund in proportion to the total valuation of each Class. Upon redemption, shareholders are only entitled to their portion of the net assets held in the Fund in respect of which shares have been issued to them.

The Company has adopted U.S. Dollar as the presentation currency. The financial statements of each Fund are prepared in the functional currency of the respective Fund. The Company totals of the Funds, required under Irish Company law, are presented in U.S. Dollar, which is the primary economic environment of the Company. All amounts are in U.S. Dollar unless otherwise indicated. The financial statements of the individual Funds are translated into U.S. Dollar and accumulated for preparation of the Company's financial statements.

The Funds' Statement of Assets and Liabilities are translated using exchange rates at the financial year end and the Funds' Statement of Operations and Statement of Changes in Net Assets are translated at an average rate (as an approximate of actual rates) over the financial year for inclusion in the Funds' financial statements.

The currency gain or loss on the conversion of the Company's opening net assets, and the average rate difference arising on the translation of the Company's Statement of Operations and Statement of Changes in Net Assets, is included in the Company's Statement of Changes in Net Assets. This translation adjustment does not impact the net assets allocated to the individual Funds.

All amounts have been rounded to the nearest thousand, unless otherwise indicated. A zero balance may reflect actual amounts rounding to less than one thousand. The Schedule of Investments of certain Funds may hold transferable securities displaying both a nil par value and nil fair value when the actual par value and fair value amounts are rounded to the nearest thousand.

(b) Determination of Net Asset Value

The Net Asset Value (the "NAV") of each Fund and/or each Class will be calculated as of the close of regular trading on each Dealing Day as disclosed in the Company's most recent Prospectus or the relevant supplement.

The Company has chosen to apply the recognition and measurement provisions of International Accounting Standard ("IAS") 39 Financial Instruments: Recognition and Measurement, and the disclosure and presentation requirements of FRS 102 to account for its financial instruments. In accordance with IAS 39, Fund securities and other assets are valued at the mid or last traded price on the 31 December 2022 to determine the Net Assets Attributable to Redeemable Participating Shareholders ("Net Assets").

(c) Securities Transactions and Investment Income

Securities transactions are recorded as of the trade date for financial reporting purposes. Securities purchased or sold on a when-issued or delayed-delivery basis may be settled beyond a standard settlement period for the security after the trade date. Realised gains and losses from securities sold are recorded on the identified cost basis. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Interest income, adjusted for the accretion of discounts and amortisation of premiums, is recorded on the accrual basis from settlement date and calculated using an effective interest methodology, with the exception of securities with a forward starting effective date, where interest income is recorded on the accrual basis from effective date. For convertible securities, premiums attributable to the conversion feature are not amortised. Paydown gains (losses) on mortgagerelated and other asset-backed securities, if any, are recorded as components of interest income on the Statement of Operations.

Debt obligations may be placed on non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful based on the consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is probable.

Income is accounted for gross of any non-reclaimable/irrecoverable withholding taxes and net of any tax credits. The withholding tax is shown separately in the Statement of Operations. The Funds may be subject to taxes imposed by certain countries on capital gains on the sale of investments. Capital gains taxes are accounted for on an accruals basis and are shown separately in the Statement of Operations.

(d) Multi-Class Allocations and Hedge Share Classes

Each Class of a Fund offered by the Company has equal rights, unless otherwise specified, to assets and voting privileges (except that shareholders of a Class have exclusive voting rights regarding any matter relating solely to that Class). Within each Class of each Fund, the Company may issue either or all Income Shares (shares which distribute income), Accumulation Shares (shares which accumulate income) and Income II Shares (shares which seek to distribute an enhanced yield). The multiple Class structure permits an investor to choose the method of purchasing shares that is most beneficial to the shareholder, given the amount of the purchase, the length of time the shareholder expects to hold the shares, and other circumstances. Where there are shares of a different Class or type in issue, the NAV per share amongst Classes may differ to reflect the fact that income has been accumulated or distributed, or may have differing fees and expenses. Realised and unrealised capital gains and losses of each Fund are allocated daily to each Class of shares based on the relative net assets of each Class of the respective Fund.

With respect to the hedged share classes (the "Hedged Classes"), the Company intends to hedge against movements of the currency denominations of the Hedged Classes versus other currencies subject to the regulations and interpretations promulgated by the Central Bank from time to time. The Hedged Classes shall not be leveraged as a result of these transactions. While the Company will attempt to hedge currency risk, there can be no guarantee that it will be successful in doing so. Hedging transactions will be clearly attributable to a specific Class. All costs and gains/(losses) of such hedging transactions shall substantially limit shareholders in the relevant Hedged Class from benefiting if the Class currency falls against the functional currency and/or the currency in which some or all of the assets of the relevant Fund are denominated in and hedged to other currencies.

(e) Foreign Currency Transactions

The financial statements of each Fund are presented using the currency of the primary economic environment in which it operates (the "functional currency"). The Funds in the Company have the same functional and presentation currency.

The Company totals of the Funds, required under Irish Company law, are presented in U.S. Dollar, which is the primary economic environment of the Company.

The fair values of foreign securities, currency holdings and other assets and liabilities are translated into the functional currency of each Fund based on the current exchange rates for each business day. Fluctuations in the value of currency holdings and other assets and liabilities resulting from changes in exchange rates are recorded as unrealised gains or losses on foreign currencies.

The unrealised gains or losses arising from the translation of securities denominated in a foreign currency are included in Net change in unrealised appreciation/(depreciation) on transferable securities, investment funds, repurchase agreements and deposits with credit institutions and unrealised gains or losses arising from the translation of financial derivative instruments denominated in a foreign currency are included in Net change in unrealised appreciation/(depreciation) on financial derivative instruments in the Statement of Operations.

Currency gains and losses arising from sale of securities denominated in a foreign currency are included in Net realised gain/(loss) on transferable securities, investment funds, repurchase agreements and deposits with credit institutions and currency gains or losses arising from the sale of financial derivative instruments denominated in a foreign currency are included in Net realised gain/(loss) on financial derivative instruments in the Statement of Operations.

Realised gains and losses arising between the transaction and settlement dates on purchases and sales of foreign currency denominated securities and financial derivative instruments are included in Net realised gain/(loss) on foreign currency in the Statement of Operations.

Certain Funds having a Hedged Class enter into forward foreign currency contracts designed to offset the effect of hedging at the Fund level in order to leave the functional currency with an exposure to currencies other than the functional currency.

(f) Transaction Costs

Transaction costs are costs incurred to acquire financial assets and liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisors, brokers and dealers. Transaction costs are included on the Statement of Operations within Net realised gain/(loss) and Net change in unrealised appreciation/(depreciation) on transferable securities, investment funds, repurchase agreements and deposits with credit institutions and Net realised gain/(loss) and Net change in unrealised appreciation/(depreciation) on financial derivative instruments. For fixed income securities and certain derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

(g) Equalisation

The Company follows the accounting practice known as income equalisation. The income equalisation adjustment ensures income distributed to the shareholders investing in the Income and Income II share classes is in proportion to the time of ownership in the distribution period. A sum equal to that part of the issued price per share which reflects net income (if any) accrued but undistributed up to the date of issue of the shares will be deemed to be an equalisation payment and treated as repaid to the relevant shareholder on (i) the redemption of such shares prior to the payment of the first dividend thereon or (ii) the payment of the first dividend to which the shareholder was entitled in the same accounting period as that in which the shares are issued. The payment of any dividends subsequent to the payment of the first dividend thereon or the redemption of such shares subsequent to the payment of the first dividend will be deemed to include net income (if any) accrued but unpaid up to the date of the relevant redemption or declaration of dividend.

(h) Critical Accounting Estimates and Judgments

The preparation of the financial statements in conformity with FRS 102 requires the Directors to make judgments, estimates and assumptions that effect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

(i) Swing Pricing

Swing pricing can be employed as an effective mechanism to protect shareholders against the effects of dilution which may occur as a result of higher transaction related costs associated with significant net inflows or outflows. In accordance with the Articles of Association, the underlying securities of a Fund that are listed or dealt in on a regulated market are typically valued and priced at the mid or last traded price at the close, but these securities are traded using bid and offer prices. The wider the spreads between these bid and offer prices, the higher the impact on the valuation of a Fund.

Swing pricing is implemented by moving the NAV per share up or down by a Swing Factor depending on the direction of net cash flows for a particular Fund. Swing Factor is the amount, as determined by the Directors, by which the NAV per share may be adjusted upwards or downwards in order to take account of dealing, transaction related costs (such as fiscal and other costs and charges) which would be payable on the effective acquisition or disposal of assets in the relevant Fund. Under normal market conditions, the Swing Factor will not exceed 2% of the original NAV per share in any Fund. In exceptional market circumstances, however, this maximum level may be increased up to 5% to protect the interests of the shareholders. This adjusted NAV will then be applied to any subscriptions or redemptions which are received on the relevant Dealing Day. Significant net inflows will cause an upward swing in the NAV per share, significant net outflows a downward

Notes to Financial Statements (Cont.)

swing. Swing pricing is implemented by the Company when net cash flows exceed a pre-determined threshold set by the Directors, beyond which the Directors believe the amount of dilution caused by transaction related costs could be material to a Fund.

Swing pricing when implemented will be at a Fund level rather than Class level as transaction related costs are incurred at Fund level.

As at 31 December 2022, swing pricing was applied to the Income Fund II. No swing pricing was applied to any of the other Funds as at 31 December 2021.

The NAV per share is disclosed in Note 19 and may include a swing pricing adjustment. Swing price adjustments are recognised in the Statement of Assets and Liabilities, the Statement of Operations or the Statement of Changes in Net Assets.

3. INVESTMENTS AT FAIR VALUE AND FAIR VALUE HIERARCHY

This category has two sub-categories: financial assets and liabilities designated by management at fair value through profit or loss at inception, and those held for trading. Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are categorised as held for trading.

(a) Investment Valuation Policies

The Funds' policy requires Investment Advisors (or "PIMCO") and the Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

Gains and losses arising from changes in the fair value of financial assets and liabilities at fair value through profit or loss are included on the Statement of Operations in the financial year in which they arise.

Fund securities and other assets for which market quotes are readily available are valued at fair value. Fair value is generally determined on the basis of official closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from established market makers or prices (including evaluated prices) supplied by the Fund's approved pricing services, quotation reporting systems and other third-party sources (together, "Pricing Services").

Investments initially valued in currencies other than the functional currency of the Fund are converted using exchange rates obtained from Pricing Services. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the Fund's functional currency. The value of securities traded in foreign markets or denominated in currencies other than the Fund's functional currency may be affected significantly on a day that the relevant stock exchange is closed and the NAV may change on days when an investor is not able to purchase, redeem or exchange shares.

If the value of a security that is solely traded on a foreign exchange has materially changed after the close of the security's primary exchange or principal market but before the close of the dealing day, the security will be valued at fair value based on procedures established and approved by the Board. Securities that do not trade when a Fund is open are also valued at fair value. A Fund may determine the fair value of investments based on information provided by Pricing Services and other third party vendors, which may recommend fair value prices or adjustments with reference to other securities, indices or assets. In considering whether fair value pricing is required and in determining fair values, a Fund may, among other things, consider significant events (which may be considered to include changes in the value of securities or securities indices) that occur after the close of the relevant market and before the close of the dealing day. A Fund may utilise modelling tools provided by third party vendors to determine fair values of securities impacted by significant events. Foreign exchanges may permit trading in foreign securities on days when the Company is not open for business, which may result in a Fund's portfolio of investments being

affected when the Fund is unable to buy or sell shares. The Funds have retained Pricing Services to assist in determining the fair value of foreign securities. This service utilises statistics and programmes based on historical performance of markets and other economic data to assist in making fair value estimates. Fair value estimates used by a Fund for foreign securities may differ from the value realised from the sale of those securities and the difference could be material to the financial statements. Fair value pricing may require subjective determinations about the value of a security or other asset, and fair values used to determine a Fund's NAV may differ from quoted or published prices, or from prices that are used by others, for the same investments. In addition, the use of fair value pricing may not always result in adjustments to the prices of securities or other assets held by a Fund.

(b) Fair Value Hierarchy

The Company is required to disclose the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

Fair value is defined as the amount for which an asset could be exchanged, a liability settled, or an equity instrument granted could be exchanged, between knowledgeable, willing parties in an arm's length transaction. Disclosure of a fair value hierarchy is required separately for each major category of assets and liabilities that segregates fair value measurements into levels (Levels 1, 2, and 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Levels 1, 2, and 3 of the fair value hierarchy are defined as follows:

- Level 1 Quoted prices in active markets or exchanges for identical assets and liabilities.
- Level 2 Significant other observable inputs, which may include, but
 are not limited to, quoted prices for similar assets or liabilities in markets
 that are active, quoted prices for identical or similar assets or liabilities in
 markets that are not active, inputs other than quoted prices that are
 observable for the assets or liabilities (such as interest rates, yield curves,
 volatilities, prepayment speeds, loss severities, credit risks and default
 rates) or other market corroborated inputs.
- Level 3 Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

(c) Valuation Techniques and the Fair Value Hierarchy

The valuation methods (or "techniques") and significant inputs used in determining the fair values of financial instruments classified as Level 1 and Level 2 of the fair value hierarchy are as follows:

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or by Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The Pricing Services' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorised as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis or as a repurchase commitment in a sale-buyback transaction or in a reverse repurchase transactions are marked to market daily until settlement at the forward settlement date and are categorised as Level 2 of the fair value hierarchy.

Mortgage-related and asset-backed securities are usually issued as separate tranches, or classes, of securities within each deal. These securities are also normally valued by Pricing Services that use broker dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, current market data, estimated cash flows and market-based yield spreads for each tranche, and incorporate deal collateral performance, as available. Mortgage-related and asset-backed securities that use similar valuation techniques and inputs as described above are categorised as Level 2 of the fair value hierarchy.

Common stocks, ETFs, exchange-traded notes and financial derivative instruments, such as futures contracts, rights and warrants, or options on futures that are traded on a national securities exchange, are stated at the last reported sale or settlement price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorised as Level 1 of the fair value hierarchy.

Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the New York Stock Exchange ("NYSE") close. These securities are valued using Pricing Services that consider the correlation of the trading patterns of the foreign security to the intraday trading in U.S. markets for investments. Securities using these valuation adjustments are categorised as Level 2 of the fair value hierarchy. Preferred securities and other equities traded on inactive markets or valued by reference to similar instruments are also categorised as Level 2 of the fair value hierarchy.

Valuation adjustments may be applied to certain exchange traded futures and options to account for market movement between the exchange settlement and the NYSE close. These securities are valued using quotes obtained from a quotation reporting system, established market makers or pricing services. Financial derivatives using these valuation adjustments are categorised as Level 2 of the fair value hierarchy.

Investments in registered open-end investment companies (other than ETFs) will be valued based upon the NAVs of such investments and are categorised as Level 1 of the fair value hierarchy. Investments in unregistered open-end investment companies will be calculated based upon the NAVs of such investments and are considered Level 1 provided that the NAVs are observable, calculated daily and are the value at which both purchases and sales will be conducted.

Over-the-counter financial derivative instruments, such as forward foreign currency contracts, options contracts, or swap agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or Pricing Services. Depending on the product and the terms of the transaction, the value of the derivative contracts can be estimated by Pricing Services using a series of inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, dividends and exchange rates. Derivatives that use similar valuation techniques and inputs as described above are categorised as Level 2 of the fair value hierarchy.

Equity exchange-traded options and over the counter financial derivative instruments, such as forward foreign currency contracts and options contracts derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of quotes obtained from a quotation reporting system, established market makers or Pricing Services (normally determined as of the NYSE Close). Depending on the product and the terms of the transaction, financial derivative instruments can be valued by Pricing Services using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as quoted prices, issuer details, indices, bid/ask spreads, interest rates, implied volatilities, yield curves, dividends and exchange rates. Financial derivative instruments that use similar valuation techniques and inputs as described above are categorised as Level 2 of the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange are valued at the daily settlement price determined by the respective exchange. For centrally cleared credit default swaps the clearing facility requires its members to provide actionable levels across complete term structures. These levels along with external third party prices are used to produce daily settlement prices. These securities are categorised as Level 2 of the fair value hierarchy. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates including the overnight index swap rate and LIBOR forward rate. These securities are categorised as Level 2 of the fair value hierarchy.

Level 3 trading assets and trading liabilities, at fair value When a fair valuation method is applied by PIMCO that uses significant unobservable inputs, investments will be priced by a method that the Board or persons acting at their direction believe reflects fair value and are categorised as Level 3 of the fair value hierarchy. The valuation techniques and significant inputs used in determining the fair values of Fund assets and financial instruments classified as Level 3 of the fair value hierarchy are as follows:

Proxy pricing procedures set the base price of a fixed income security and subsequently adjust the price proportionally to fair value changes of a pre-determined security deemed to be comparable in duration, generally a U.S. Treasury or sovereign note based on country of issuance. The base price may be a broker-dealer quote, transaction price, or an internal value as derived by analysis of market data. The base price of the security may be reset on a periodic basis based on the availability of market data and procedures approved by the PIMCO's Valuation Oversight Committee. Significant changes in the unobservable inputs of the proxy pricing process (the base price) would result in direct and proportional changes in the fair value of the security. These securities are categorised as Level 3 of the fair value hierarchy.

If third-party evaluated vendor pricing is not available or not deemed to be indicative of fair value, PIMCO may elect to obtain Broker Quotes directly from the broker-dealer or passed through from a third-party vendor. In the event that fair value is based upon a single sourced Broker Quote, these securities are categorised as Level 3 of the fair value hierarchy. Broker Quotes are typically received from established market participants. Although independently received, PIMCO does not have the transparency to view the underlying inputs which support the market quotation. Significant changes in the Broker Quote would have direct and proportional changes in the fair value of the security.

Reference instrument valuation estimates fair value by utilising the correlation of the security to one or more broad-based securities, market indices, and/or other financial instruments, whose pricing information is readily available. Unobservable inputs may include those used in algorithm formulas based on percentage change in the reference instruments and/or weights of each reference instrument. Significant changes in the unobservable inputs would result in direct and proportional changes in the fair value of the security. These securities are categorised as Level 3 of the fair value hierarchy.

Fundamental analysis valuation estimates fair value by using an internal model that utilises financial statements of the non-public underlying company. Significant changes in the unobservable inputs would result in direct and proportional changes in the fair value of the security. These securities are categorised as Level 3 of the fair value hierarchy.

Short-term debt instruments (such as commercial paper) having a remaining maturity of 60 days or less may be valued at amortised cost, so long as the amortised cost value of such short-term debt instruments is approximately the same as the fair value of the instrument as determined without the use of amortised cost valuation. These securities are categorised as Level 2 or Level 3 of the fair value hierarchy depending on the source of the base price.

4. SECURITIES AND OTHER INVESTMENTS

(a) Cash

Cash is valued at face value with interest accrued, where applicable. All cash at bank balances are held either by State Street Bank and Trust Co. or directly with a sub-depositary.

(b) Investments in Central Funds

Certain Funds may also invest in the PIMCO US Dollar Short-Term Floating NAV Fund, a sub-fund of PIMCO Select Funds plc, in connection with their cash management activities. The main investments of the PIMCO US Dollar Short-Term Floating NAV Fund are money market instruments and short maturity fixed income instruments. The PIMCO US Dollar Short-Term Floating NAV Fund may incur expenses related to its investment activities, but the PIMCO Funds only invest in the Z Class and thus no Management Fees are incurred.

(c) Investments in Securities

The Funds may utilise the investments and strategies described below to the extent permitted by the Funds' investment policies.

Delayed-Delivery Transactions Certain Funds may purchase or sell securities on a delayed-delivery basis. These transactions involve a commitment by a Fund to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, a Fund will designate or receive as collateral liquid assets in an amount sufficient to meet the purchase price or respective obligations. When purchasing a security on a delayed-delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its NAVs. A Fund may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realised gain or loss. When a Fund has sold a security on a delayed-delivery basis, the Fund does not participate in future gains and losses with respect to the security.

Exchange-Traded Funds Certain Funds may invest in exchange-traded funds ("ETFs"), which typically are index-based investment companies that hold substantially all of their assets in securities representing their specific index, but may also be actively-managed investment companies. Shares of ETFs trade throughout the day on an exchange and represent an investment in a portfolio of securities and assets. As a shareholder of another investment company, a Fund would bear its pro-rata portion of the other investment company's expenses, including advisory fees, in addition to the expenses a Fund bears directly in connection with its own operations.

Inflation-Indexed Bonds Certain Funds may invest in inflation-indexed bonds which are fixed income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value, which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the Statement of Operations, even though investors do not receive their principal until maturity. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of certain inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

Loan Participations and Assignments Certain Funds may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. When a Fund purchases assignments from lenders it acquires direct rights against the borrower of the loans. These loans may include participations in "bridge loans", which are loans taken out by borrowers for a short period (typically less than one year) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high yield bonds issued for the purpose of acquisitions.

The types of loans and related investments in which a Fund may invest include, among others, senior loans, subordinated loans (including second lien loans, B-Notes and mezzanine loans), whole loans, commercial real estate and other commercial loans and structured loans. In the case of subordinated loans, there may be significant indebtedness ranking ahead of the borrower's obligation to the holder of such a loan, including in the event of the borrower's insolvency. Mezzanine loans are typically secured by a pledge of an equity interest in the mortgage borrower that owns the real estate rather than an interest in a mortgage.

Investments in loans may include unfunded loan commitments, which are contractual obligations for funding. Unfunded loan commitments may include revolving credit facilities, which may obligate the Funds to supply additional cash to the borrower on demand. Unfunded loan commitments represent a future obligation in full, even though a percentage of the committed amount may not be utilised by the borrower. When investing in a loan participation, a Fund has the right to receive payments of principal,

interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower. A Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a floating rate loan. In certain circumstances, a Fund may receive a penalty fee upon the prepayment of a floating rate loan by a borrower. Fees earned or paid are recorded as a component of interest income or interest expense, respectively, on the Statement of Operations.

Unfunded loan commitments as of 31 December 2022 and 31 December 2021 are recognised as a liability, within Payable for investments purchased, on the Statement of Assets and Liabilities.

Mortgage Related and Other Asset-Backed Securities Certain Funds may invest in mortgage related and other asset-backed securities that directly or indirectly represent a participation in, or are secured by and payable from, loans on real property. Mortgage related securities are created from pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. These securities provide a monthly payment which consists of both interest and principal. Interest may be determined by fixed or adjustable rates. The rate of prepayments on underlying mortgages will affect the price and volatility of a mortgage related security, and may have the effect of shortening or extending the effective duration of the security relative to what was anticipated at the time of purchase. The timely payment of principal and interest of certain mortgage related securities is guaranteed with the full faith and credit of the U.S. Government. Pools created and guaranteed by non-governmental issuers, including government-sponsored corporations, may be supported by various forms of insurance or guarantees, but there can be no assurance that private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Many of the risks of investing in mortgage related securities secured by commercial mortgage loans reflect the effects of local and other economic conditions on real estate markets, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. These securities may be less liquid and may exhibit greater price volatility than other types of mortgage related or other asset-backed securities. Other asset-backed securities are created from many types of assets, including auto loans, accounts receivable, such as credit card receivables and hospital account receivables, home equity loans, student loans, boat loans, mobile home loans, recreational vehicle loans, manufactured housing loans, aircraft leases, computer leases and syndicated bank loans.

Collateralised Debt Obligations ("CDOs") include Collateralised Bond Obligations ("CBOs"), Collateralised Loan Obligations ("CLOs") and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. A CLO is a trust typically collateralised by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. CBOs, CLOs and other CDOs carry additional risks including, but not limited to, (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments, (ii) the quality of the collateral may decline in value or default, (iii) a Fund may invest in CBOs, CLOs, or other CDOs that are subordinate to other classes, and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Collateralised Mortgage Obligations ("CMOs") are debt obligations of a legal entity that are collateralised by whole mortgage loans or private mortgage bonds and divided into classes. CMOs are structured into multiple classes, often referred to as "tranches", with each class bearing a different stated maturity and entitled to a different schedule for payments of principal and interest, including prepayments. CMOs may be less liquid and may exhibit greater price volatility than other types of mortgage related or asset-backed securities.

Stripped Mortgage-Backed Securities ("SMBS") are derivative multiclass mortgage securities. SMBS are usually structured with two classes that

receive different proportions of the interest and principal distributions on a pool of mortgage assets. A SMBS will have one class that will receive all of the interest (the interest-only or "IO" class), while the other class will receive the entire principal (the principal-only or "PO" class). Payments received for IOs are included in interest income on the Statement of Operations. Because no principal will be received at the maturity of an IO, adjustments are made to the cost of the security on a monthly basis until maturity. These adjustments are included in interest income on the Statement of Operations. Payments received for POs are treated as reductions to the cost and par value of the securities.

Payment In-Kind Securities Certain Funds may invest in payment in-kind securities ("PIKs"). PIKs may give the issuer the option at each interest payment date of making interest payments in either cash and/or additional debt securities. Those additional debt securities usually have the same terms, including maturity dates and interest rates, and associated risks as the original bonds. The daily market quotations of the original bonds may include the accrued interest (referred to as a "dirty price") which is reflected as a component of Financial Assets at fair value through profit or loss on Transferable Securities on the Statement of Assets and Liabilities.

Securities issued by U.S. Government Agencies or Government-Sponsored Enterprises Certain Funds may invest in securities of U.S. Government agencies or government-sponsored enterprises. U.S. Government securities are obligations of and, in certain cases, guaranteed by, the U.S. Government, its agencies or instrumentalities. Some U.S. Government securities, such as Treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association ("GNMA" or "Ginnie Mae"), are supported by the full faith and credit of the U.S. Government; others, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Department of the Treasury (the "U.S. Treasury"); and others, such as those of the Federal National Mortgage Association ("FNMA" or "Fannie Mae"), are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations. U.S. Government securities may include zero coupon securities. Zero coupon securities do not distribute interest on a current basis and tend to be subject to a greater risk than interestpaying securities.

Government-related guarantors (i.e., not backed by the full faith and credit of the U.S. Government) include FNMA and the Federal Home Loan Mortgage Corporation ("'FHLMC" or "Freddie Mac"). FNMA is a government-sponsored corporation. FNMA purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation Certificates ("PCs"), which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government.

In June 2019, FNMA and FHLMC started issuing Uniform Mortgage-Backed Securities in place of their current offerings of TBA-eligible securities (the "Single Security Initiative"). The Single Security Initiative seeks to support the overall liquidity of the TBA market and aligns the characteristics of FNMA and FHLMC certificates. The effects that the Single Security Initiative may have on the market for TBA and other mortgage-backed securities are uncertain.

Roll-timing strategies can be used where the Fund seeks to extend the expiration or maturity of a position such as a To Be Announced ("TBA") security on an underlying asset, by closing out the position before expiration and opening a new position with respect to the same underlying asset with a later expiration date. TBA securities purchased or sold are reflected on the Statement of Assets and Liabilities as an asset or liability, respectively.

Real Estate Investment Trusts ("REITs") Certain Funds may invest in REITs, which are pooled investment vehicles that own, and typically operate, income-producing real estate. If a REIT meets certain requirements, including distributing to shareholders substantially all of its taxable income (other than net capital gains), then it is not taxed on the income distributed to shareholders. Distributions received from REITs may be characterised as income, capital gain or a return of capital. A return of capital is recorded by the Fund as a reduction to the cost basis of its investment in the REIT. REITs are subject to management fees and other expenses, and so the Funds that invest in REITs will bear their proportionate share of the costs of the REITs' operations.

Restricted Securities Certain Funds may invest in securities that are subject to legal or contractual restrictions on resale and may generally be sold privately, but are required to be registered or exempted from such registration before being sold to the public. Private placement securities are generally considered to be restricted. Disposal of restricted securities may involve time-consuming negotiations and expenses, and prompt sale at an acceptable price may be difficult to achieve. Restricted securities held by the Funds at 31 December 2022 are disclosed in the Notes to Schedule of Investments

When-Issued Transactions Certain Funds may purchase or sell securities on a when-issued basis. These transactions are made conditionally because a security, although authorised, has not yet been issued in the market. Transactions to purchase or sell securities on a when-issued basis involve a commitment by a Fund to purchase or sell these securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. A Fund may sell when-issued securities before they are delivered, which may result in a realised gain or loss.

Perpetual Bonds Certain Funds may invest in perpetual bonds which are fixed income securities with no maturity date but pay a coupon in perpetuity (with no specified ending or maturity date). Unlike typical fixed income securities, there is no obligation for perpetual bonds to repay principal. The coupon payments, however, are mandatory. While perpetual bonds have no maturity date, they may have a callable date in which the perpetuity is eliminated and the issuer may return the principal received on the specified call date. Additionally, a perpetual bond may have additional features, such as interest rate increases at periodic dates or an increase as of a predetermined point in the future.

Warrants are securities that are usually issued together with a debt security or preferred security and that give the holder the right to buy a proportionate amount of common stock at a specified price. Warrants normally have a life that is measured in years and entitle the holder to buy common stock of a company at a price that is usually higher than the market price at the time the warrant is issued. Warrants may entail greater risks than certain other types of investments. Generally, warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. If the market price of the underlying stock does not exceed the exercise price during the life of the warrant, the warrant will expire worthless. Warrants may increase the potential profit or loss to be realised from the investment as compared with investing the same amount in the underlying securities. Similarly, the percentage increase or decrease in the value of an equity security warrant may be greater than the percentage increase or decrease in the value of the underlying common stock. Warrants may relate to the purchase of equity or debt securities. Debt obligations with warrants attached to purchase equity securities have many characteristics of convertible securities and their prices may, to some degree, reflect the performance of the underlying stock. Debt obligations also may be issued with warrants attached to purchase additional debt securities at the same coupon rate. A decline in interest rates would permit the Portfolio to sell such warrants at a profit. If interest rates rise, these warrants would generally expire with no value.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Funds may enter into the borrowings and other financing transactions described below to the extent permitted by the Funds' investment policies.

The following disclosures contain information on the Funds' ability to lend or borrow cash or securities to the under the relevant Central Bank regulations

Notes to Financial Statements (Cont.)

and Prospectus, extent permitted by the investment objectives and policies of the Funds and subject to the limits set down by the Central Bank from time to time and to the provisions of the Prospectus, which may be viewed as borrowing or financing transactions by the Funds. The location of these instruments in the Funds' financial statements is described below:

(a) Repurchase Agreements

Certain Funds may engage in repurchase agreements. Under the terms of a typical repurchase agreement, a Fund takes possession of an underlying debt obligation ("collateral") subject to an obligation of the seller to repurchase, and a Fund to resell, the obligation at an agreed-upon price and time. In an open maturity repurchase agreement, there is no pre-determined repurchase date and the agreement can be terminated by the Fund or counterparty at any time. The underlying securities for all repurchase agreements are held by a Fund's custodian or designated subcustodians under tri-party repurchase agreements and in certain instances will remain in custody with the counterparty. The fair value of the collateral must be equal to or exceed the total amount of the repurchase obligations, including interest. Repurchase agreements, including accrued interest, are included on the Statement of Assets and Liabilities. Interest earned is recorded as a component of interest income on the Statement of Operations. In periods of increased demand for collateral, a Fund may pay a fee for receipt of collateral, which may result in interest expense to the Fund.

(b) Reverse Repurchase Agreements

Certain Funds may enter into reverse repurchase agreements. In a reverse repurchase agreement, a Fund delivers a security in exchange for cash to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed upon price and date. In an open maturity reverse repurchase agreement, there is no pre-determined repurchase date and the agreement can be terminated by the Fund or counterparty at any time. A Fund is entitled to receive principal and interest payments, if any, made on the security delivered to the counterparty during the term of the agreement. Cash received in exchange for securities delivered plus accrued interest payments to be made by a Fund to counterparties are reflected as a liability on the Statement of Assets and Liabilities. Interest payments made by a Fund to counterparties are recorded as a component of interest expense on the Statement of Operations. In periods of increased demand for the security, a Fund may receive a fee for use of the security by the counterparty, which may result in interest income to a Fund. A Fund will segregate assets determined to be liquid by the Investment Advisors or will otherwise cover its obligations under reverse repurchase agreements.

(c) Short Sales

Certain Funds may enter into short sales transactions. A short sale is a transaction in which a Fund sells securities it may not own in anticipation of a decline in the fair value of the securities. Securities sold in short sale transactions and the interest payable on such securities, if any, are reflected as a liability on the Statement of Assets and Liabilities. A Fund is obligated to deliver securities at the trade price at the time the short position is covered. Possible losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested.

(d) Sale-Buybacks

Certain Funds may enter into financing transactions referred to as 'salebuybacks'. A sale-buyback transaction consists of a sale of a security by a Fund to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed-upon price and date. A Fund is not entitled to receive principal and interest payments, if any, made on the security sold to the counterparty during the term of the agreement. The agreed-upon proceeds for securities to be repurchased by a Fund are reflected as a liability on the Statement of Assets and Liabilities. A Fund will recognise net income represented by the price differential between the price received for the transferred security and the agreed-upon repurchase price. This is commonly referred to as the 'price drop'. A price drop consists of (i) the foregone interest and inflationary income adjustments, if any, a Fund would have otherwise received had the security not been sold and (ii) the negotiated financing terms between a Fund and counterparty. Foregone interest and inflationary income adjustments, if any, are recorded as components of interest income on the Statement of Operations. Interest payments based upon negotiated financing terms made by a Fund to counterparties are recorded as a component of interest expense on the Statement of Operations. In periods of increased

demand for the security, a Fund may receive a fee for use of the security by the counterparty, which may result in interest income to a Fund. A Fund will segregate assets determined to be liquid by the Investment Advisors or will otherwise cover its obligations under sale-buyback transactions.

6. FINANCIAL DERIVATIVE INSTRUMENTS

The following disclosures contain information on how and why the Funds use financial derivative instruments and how financial derivative instruments affect the Funds' financial positions, results of operations and cash flows. The financial derivative instruments outstanding as of financial year end as disclosed in the Schedule of Investments and the amounts of realised and changes in unrealised gains and losses on financial derivative instruments during the financial year, as disclosed in the Statement of Operations, serve as indicators of the volume of financial derivative activity for the Funds.

(a) Forward Foreign Currency Contracts

Certain Funds may enter into forward foreign currency contracts in connection with settling planned purchases or sales of securities, to hedge the currency exposure associated with some or all of a Fund's securities or as a part of an investment strategy. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The fair value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. Forward foreign currency contracts are marked to market daily, and the change in value is recorded by a Fund as an unrealised gain or loss. Realised gains or losses are equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed and are recorded upon delivery or receipt of the currency. These contracts may involve market risk in excess of the unrealised gain or loss reflected on the Statement of Assets and Liabilities. In addition, a Fund could be exposed to risk if the counterparties are unable to meet the terms of the contracts or if the value of the currency changes unfavourably to the functional currency. To mitigate such risk, cash or securities may be exchanged as collateral pursuant to the terms of the underlying contracts.

Certain Funds having a hedged class enter into forward foreign currency contracts designed to offset the effect of hedging at the Fund level in order to leave the hedged class with an exposure to currencies other than the functional currency. There can be no guarantee that these class specific forward foreign currency contracts will be successful.

For Class level hedges the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses are reflected as a component of financial derivative instruments on the Statement of Assets and Liabilities. In connection with these contracts, securities may be identified as collateral in accordance with the terms of the respective contracts.

(b) Futures Contracts

Certain Funds may enter into futures contracts. A Fund may use futures contracts to manage its exposure to the securities markets or to movements in interest rates and currency values. The primary risks associated with the use of futures contracts are the imperfect correlation between the change in fair value of the securities held by a Fund and the prices of futures contracts and the possibility of an illiquid market. Futures contracts are valued based upon their quoted daily settlement prices. Upon entering into a futures contract, a Fund is required to deposit with its futures broker an amount of cash, U.S. Government and Agency Obligations, or select sovereign debt, in accordance with the initial margin requirements of the broker or exchange. Futures contracts are marked to market daily and based on such movements in the price of the contracts, an appropriate payable or receivable for the change in value may be posted or collected by the Fund ("Financial Derivatives Margin"). Gains or losses are recognised but not considered realised until the contracts expire or close. Futures contracts involve, to varying degrees, risk of loss in excess of the Financial Derivatives Margin included on the Statement of Assets and Liabilities.

(c) Options Contracts

Certain Funds may write or purchase options to enhance returns or to hedge an existing position or future investment. A Fund may write call and put options on securities and financial derivative instruments they own or in which they may invest. Writing put options tends to increase a Fund's exposure to the underlying instrument. Writing call options tends to decrease

a Fund's exposure to the underlying instrument. When a Fund writes a call or put, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. These liabilities are included on the Statement of Assets and Liabilities. Premiums received from writing options which expire are treated as realised gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying futures, swap, security or currency transaction to determine the realised gain or loss. Certain options may be written with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms. A Fund, as a writer of an option, has no control over whether the underlying instrument may be sold ("call") or purchased ("put") and as a result bears the market risk of an unfavourable change in the price of the instrument underlying the written option. There is the risk a Fund may not be able to enter into a closing transaction because of an illiquid market.

A Fund may also purchase put and call options. Purchasing call options tends to increase a Fund's exposure to the underlying instrument. Purchasing put options tends to decrease a Fund's exposure to the underlying instrument. A Fund pays a premium which is included as an asset on the Statement of Assets and Liabilities and subsequently marked to market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realised losses. Certain options may be purchased with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realised gain or loss when the underlying transaction is executed.

Credit Default Swaptions Certain Funds may write or purchase credit default swaptions to hedge exposure to the credit risk of an investment without making a commitment to the underlying instrument. A credit default swaption is an option to sell or buy credit protection to a specific reference by entering into a pre-defined swap agreement by some specified date in the future.

Foreign Currency Options Certain Funds may write or purchase foreign currency options. Writing or purchasing foreign currency options gives a Fund the right, but not the obligation to buy or sell the specified amounts of currency at a rate of exchange that may be exercised by a certain date. These options may be used as a short or long hedge against possible variations in foreign exchange rates or to gain exposure to foreign currencies.

Inflation-Capped Options Certain Funds may write or purchase inflationcapped options to enhance returns or for hedging opportunities. When a Fund writes an inflation-capped option, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. When a Fund purchases an inflation-capped option, the Fund pays a premium which is recorded as an asset and subsequently marked to market to reflect the current value of the option. The purpose of purchasing inflation-capped options is to protect a Fund from inflation erosion above a certain rate on a given notional exposure. A floor can be used to give downside protection to investments in inflation-linked products.

Interest Rate-Capped Options Certain Funds may write or purchase interest rate-capped options to enhance returns or for hedging opportunities. When a Fund writes an interest rate-capped option, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. When a Fund purchases an interest rate-capped option, the Fund pays a premium which is recorded as an asset and subsequently marked to market to reflect the current value of the option. The purpose of purchasing interest rate-capped options is to protect a Fund from floating rate risk above a certain rate on a given notional exposure. A floor can be used to give downside protection to investments in interest rate linked products.

Options on Exchange-Traded Futures Contracts Certain Funds may write or purchase options on exchange-traded futures contracts ("Futures Option") to hedge an existing position or future investment, for speculative purposes or to manage exposure to market movements. A Futures Option is an option contract in which the underlying instrument is a single futures contract.

Options on Commodity Futures Contracts Certain Funds may write or purchase options on commodity futures contracts ("Commodity Option"). The underlying instrument for the Commodity Option is not the commodity itself, but rather a futures contract for that commodity. The exercise for a Commodity Option will not include physical delivery of the underlying commodity but will rather settle the amount of the difference between the current fair value of the underlying futures contract and the strike price directly into a Fund's depositary account. For an option that is in-the-money, a Fund will normally offset its position rather than exercise the option to retain any remaining time value.

Barrier Options Certain Funds may write or purchase a variety of options with non-standard payout structures or other features ("Barrier Options"). Barrier Options are generally traded OTC. A Fund may invest in various types of Barrier Options including down-and-in and up-and-in options. Down-and-in and up-and-in options are similar to standard options, except that the option expires worthless to the purchaser of the option if the price of the underlying instrument does, or does not reach a specific barrier price level prior to the option's expiration date.

Interest Rate Swaptions Certain Funds may write or purchase interest rate swaptions which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes the counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed-rate receiver or a fixed-rate payer upon exercise.

Options on Securities Certain Funds may write or purchase options on securities to enhance returns or to hedge an existing position or future investment. An option on a security uses a specified security as the underlying instrument for the option contract.

Straddle Options Certain Funds may enter into differing forms of straddle options ("Straddle"). A Straddle is an investment strategy that uses combinations of options that allow a Fund to profit based on the future price movements of the underlying security, regardless of the direction of those movements. A written Straddle involves simultaneously writing a call option and a put option on the same security with the same strike price and expiration date. The written Straddle increases in value when the underlying security price has little volatility before the expiration date. A purchased Straddle involves simultaneously purchasing a call option and a put option on the same security with the same strike price and expiration date. The purchased Straddle increases in value when the underlying security price has high volatility, regardless of direction, before the expiration date.

(d) Swap Agreements

Certain Funds may invest in swap agreements. Swap agreements are bilaterally negotiated agreements between a Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. Swap agreements are privately negotiated in the over-the-counter market ("OTC swaps") or may be cleared through a third party, known as a central counterparty or derivatives clearing organisation ("Centrally Cleared Swaps"). A Fund may enter into asset, credit default, cross-currency, interest rate, total return, variance and other forms of swap agreements to manage its exposure to credit, currency, interest rate, commodity, equity and inflation risk. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Centrally Cleared Swaps are marked to market daily based upon valuations as determined from the underlying contract or in accordance with the requirements of the central counterparty or derivatives clearing organisation. Changes in fair value, if any, are reflected as a component of net change in unrealised appreciation/(depreciation) on the Statement of Operations. Daily changes in valuation of centrally cleared swaps ("Swap Variation Margin"), if any, are recorded as a receivable or payable for the change in value as appropriate on the Statement of Assets and Liabilities. OTC swap payments received or paid at the beginning of the measurement period are included on the Statement of Assets and Liabilities and represent premiums paid or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing

Notes to Financial Statements (Cont.)

market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). Upfront premiums received (paid) are initially recorded as liabilities (assets) and subsequently marked to market to reflect the current value of the swap. These upfront premiums are recorded as realised gains or losses on the Statement of Operations upon termination or maturity of the swap. A liquidation payment received or made at the termination of the swap is recorded as realised gain or loss on the Statement of Operations. Net periodic payments received or paid by a Fund are included as part of realised gains or losses on the Statement of Operations.

For purposes of applying certain of the Fund's investment policies and restrictions, swap agreements like other derivative instruments, may be valued by the Fund at fair value, notional value or full exposure value. In the case of a credit default swap (see below), however, in applying certain of the Fund's investment policies and restrictions, the Fund will value the credit default swap at its notional value or its full exposure value (i.e., the sum of the notional amount for the contract plus the fair value), but may value the credit default swap at fair value for purposes of applying certain of the Fund's other investment policies and restrictions. For example, a Fund may value credit default swaps at full exposure value for purposes of the Fund's credit quality quidelines (if any) because such value reflects the Fund's actual economic exposure during the term of the credit default swap agreement. In this context, both the notional amount and the fair value may be positive or negative depending on whether the Fund is selling or buying protection through the credit default swap. The manner in which certain securities or other instruments are valued by the Fund for purposes of applying investment policies and restrictions may differ from the manner in which those investments are valued by other types of investors.

Entering into these agreements involves, to varying degrees, elements of interest, credit, market and documentation risk in excess of the amounts recognised on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavourable changes in interest rates.

A Fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that amount is positive. The risk is mitigated by having a master netting arrangement between a Fund and the counterparty and by the posting of collateral to a Fund to cover a Fund's exposure to the counterparty.

Correlation Swap Agreements Certain Funds may enter into correlation swap agreements to gain or mitigate exposure to the underlying reference assets. Correlation swap agreements involve two parties agreeing to exchange cash flows based on the measured correlation of specified underlying assets. One party agrees to exchange a "fixed rate" or strike rate payment for the "floating rate" or realised price correlation on the underlying asset with respect to the notional amount. At inception, the strike rate is generally chosen such that the fair value of the swap is zero. At the maturity date, a net cash flow is exchanged, where the payoff amount is equivalent to the difference between the realised price correlation of the underlying asset and the strike rate multiplied by the notional amount. As a receiver of the fixed strike rate price correlation, the Fund would receive the payoff amount when the realised price correlation of the underlying asset is less than the strike rate and would owe the payoff amount when the correlation is greater than the strike. As a payer of the fixed strike rate price correlation, the Fund would owe the payoff amount when the realised price correlation of the underlying asset is less than the strike rate and would receive the payoff amount when the correlation is greater than the strike. This type of agreement is essentially a forward contract on the future realised price correlation of the underlying asset.

Credit Default Swap Agreements Certain Funds may use credit default swaps on corporate, loan, sovereign, U.S. municipal or U.S. Treasury issues to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where a Fund owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. Credit default swap agreements involve one party making a stream of payments (referred to as the "buyer of protection") to another party (the "seller of protection") in exchange for the right to receive

a specified return in the event that the referenced entity, obligation or index, as specified in the swap agreement, undergoes a certain credit event. As a seller of protection on credit default swap agreements, the Fund will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, a Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap.

If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are estimated by market makers considering either industry standard recovery rates or entity specific factors and considerations until a credit event occurs. If a credit event has occurred, the recovery value is determined by a facilitated auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event).

Credit default swap agreements on corporate or sovereign issues involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event).

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, assetbacked securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Fund may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are instruments for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilised in determining the fair value of credit default swap agreements on corporate, loan, sovereign, U.S. municipal or U.S. Treasury issues as of year end if any, are disclosed in the Schedule of Investments. They serve as an indicator of the current status of the payment/performance risk and represent the likelihood

or risk of default for the referenced entity. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Increasing fair values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller/buyer of protection could be required to make under a credit default swap agreement equals the notional amount of the agreement. Notional amounts of each individual credit default swap agreement outstanding as of 31 December 2022 for which the Fund is the seller/buyer of protection are disclosed in the Schedule of Investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Fund for the same referenced entity or entities.

Cross-Currency Swap Agreements Certain Funds may enter into crosscurrency swap agreements to gain or mitigate exposure to currency risk. Cross-currency swap agreements involve two parties exchanging two different currencies with an agreement to reverse the exchange at a later date at specified exchange rates. The exchange of currencies at the inception date of the contract takes place at the current spot rate. The re-exchange at maturity may take place at the same exchange rate, a specified rate, or the then current spot rate. Interest payments, if applicable, are made between the parties based on interest rates available in the two currencies at the inception of the contract. The terms of cross-currency swap contracts may extend for many periods. Cross-currency swaps are usually negotiated with commercial and investment banks. Some cross-currency swaps may not provide for exchanging principal cash flows, but only for exchanging interest cash flows. The exchange of currencies at the inception date will be separately reflected on a gross basis with the notional principal currency amount as a receivable and payable, as appropriate for the fixed or floating leg, on the Statement of Assets and Liabilities.

For Class level hedges the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses are reflected in financial derivative instruments on the Statement of Assets and Liabilities. In connection with these contracts, securities may be identified as collateral in accordance with the terms of the respective contracts.

Interest Rate Swap Agreements Certain Funds are subject to interest rate risk exposure in the normal course of pursuing their investment objectives. Because a Fund holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at prevailing market rates, a Fund may enter into interest rate swap agreements. Interest rate swap agreements involve the exchange by the Fund with another party for their respective commitment to pay or receive interest on the notional amount of principal. Certain forms of interest rate swap agreements may include: (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap", (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or "floor", (iii) interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels, (iv) callable interest rate swaps, under which the buyer pays an upfront fee in consideration for the right to early terminate the swap transaction in whole, at zero cost and at a predetermined date and time prior to the maturity date, (v) spreadlocks, which allow the interest rate swap users to lock in the forward differential (or spread) between the interest rate swap rate and a specified benchmark, or (vi) basis swaps, under which two parties can exchange variable interest rates based on different segments of money markets.

Total Return Swap Agreements Certain Funds may enter into total return swap agreements. Total return swap agreements on commodities involve commitments where cash flows are exchanged based on the price of a commodity in return for either a fixed or floating price or rate. One party would receive payments based on the fair value of the commodity involved and pay a fixed amount. Total return swap agreements on indices involve commitments to pay interest in exchange for a market-linked return. One counterparty pays out the total return of a specific reference asset, which may be an equity, index, or bond, and in return receives a regular stream of payments. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Certain Funds may invest in total return equity swaps ("equity swaps"). Equity swaps can be used to secure a profit or avoid a loss by reference to fluctuations in the value or price of equities or financial instruments or in an index of such equities or financial instruments. An equity swap is a derivative instrument designed to replicate the economic performance and the cash flows of a conventional share investment.

The risks inherent in equity swaps are dependent on the position that a Fund may take in the transaction: by utilising equity swaps, a Fund may put itself in a long position on the underlying value, in which case the Fund will profit from any increase in the value of the underlying stock, and suffer from any decrease. The risks inherent in a long position are identical to the risks inherent in the purchase of the underlying stock. Conversely, a Fund may put itself in a short position on the value of the underlying stock, in which case the Fund will profit from any decrease in the underlying stock, and suffer from any increase. The risks inherent in a short position are greater than those of a long position: while there is a ceiling to a maximum loss in a long position if the underlying stock is valued at zero, the maximum loss of a short position is that of the increase in the underlying stock, an increase that, in theory, is unlimited.

It should be noted that a long or short equity swap position is based on the Investment Advisors' opinion of the future direction of the underlying security. The position could have a negative impact on the Fund's performance.

Volatility Swap Agreements are also known as forward volatility agreements and volatility swaps, and are agreements in which the counterparties agree to make payments in connection with changes in the volatility (I e., the magnitude of change over a specified period of time) of an underlying referenced instrument, such as a currency, rate, index, security or other financial instrument. Volatility swaps permit the parties to attempt to hedge volatility risk and/or take positions on the projected future volatility of an underlying referenced instrument. For example, the Fund may enter into a volatility swap in order to take the position that the referenced instrument's volatility will increase over a particular period of time. If the referenced instrument's volatility does increase over the specified time, the Fund will receive payment from its counterparty based upon the amount by which the referenced instrument's realised volatility level exceeds a volatility level agreed upon by the parties. If the referenced instrument's volatility does not increase over the specified time, the Fund will make a payment to the counterparty based upon the amount by which the referenced instrument's realised volatility level falls below the volatility level agreed upon by the parties. At the maturity date, a net cash flow is exchanged, where the payoff amount is equivalent to the difference between the realised price volatility of the referenced instrument and the strike multiplied by the notional amount. As a receiver of the realised price volatility, the Fund would receive the payoff amount when the realised price volatility of the referenced instrument is greater than the strike and would owe the payoff amount when the volatility is less than the strike. As a payer of the realised price volatility, the Fund would owe the payoff amount when the realised price volatility of the referenced instrument is greater than the strike and would receive the payoff amount when the volatility is less than the strike. Payments on a volatility swap will be greater if they are based upon the mathematical square of volatility (i.e., the measured volatility multiplied by itself, which is referred to as "variance"). This type of volatility swap is frequently referred to as a variance swap.

7. EFFICIENT PORTFOLIO MANAGEMENT

To the extent permitted by the investment objectives and policies of the Funds and subject to the limits set down by the Central Bank from time to time and to the provisions of the Prospectus, utilisation of financial derivative instruments and investment techniques shall be employed for efficient portfolio management purposes by all the Funds. The Funds may use these financial derivative instruments and investment techniques to hedge against changes in interest rates, non-functional currency exchange rates or securities prices or as part of their overall investment strategy.

The total interest income/(expense) arising from Repurchase Agreements during the financial year ended 31 December 2022 was \$155,496,772/(\$296,154) (31 December 2021: \$1,815,898/(\$4,593,880)).

The total interest income/(expense) arising from Reverse Repurchase Agreements during the financial year ended 31 December 2022 was \$9,791,008/(\$45,026,160) (31 December 2021: \$4,690,120/(\$10,666,937)).

The total interest income/(expense) arising from Sale-Buyback Transactions during the financial year ended 31 December 2022 was \$950/(\$6,496,889) (31 December 2021: \$259,028/(\$225,795)).

8. TAXATION

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended, so long as it is resident in Ireland. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation, transfer or deemed disposal (a deemed disposal will occur at the expiration of a Relevant Period) of shares or the appropriation or cancellation of shares of a shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- (a) A shareholder who is neither an Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Fund and provided the Fund is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct, or the Fund has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations;
- (b) Certain exempted Irish tax resident shareholders who have provided the Fund with the necessary signed statutory declarations;
- (c) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners;
- (d) An exchange of shares representing one sub-fund for another sub-fund of the Fund:
- (e) An exchange of shares arising on a qualifying amalgamation of or reconstruction of the Fund with another fund; and
- (f) Certain exchange of shares between spouses and former spouses.

In the absence of the appropriate declaration, the Fund will be liable to Irish tax on the occurrence of a chargeable event.

The investment undertaking regime provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident shareholders without deduction of Irish tax where no relevant declaration is in place, subject to meeting the "equivalent measures" requirement. A Fund wishing to receive approval must apply in writing to the Revenue Commissioners, confirming compliance with the relevant conditions.

Dividends, interest and capital gains (if any) which the Company receives with respect to its investments (other than securities of Irish issuers) may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located. It is anticipated that the Company may not be able to benefit from reduced rates of withholding tax in double taxation agreements between Ireland and such countries. If this position changes in the future and the application of a lower rate results in a repayment to the Company the Net Asset Value will not be re-stated and the benefit will be allocated to the existing shareholders rateably at the time of the repayment.

In accordance with the reporting fund regime introduced by the United Kingdom HM Revenue and Customs, each share class will be viewed as a separate "offshore fund" for UK tax purposes. The reporting regime permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a "reporting fund". Once an offshore fund has been granted reporting fund status it will maintain that status for so long as it continues to satisfy the conditions to be a reporting fund without a requirement to apply for further certification by HM Revenue and Customs. Each Share Class in the Company is treated as a reporting fund. This has been approved by HM Revenue and Customs.

9. DIVIDEND DISTRIBUTION POLICY

As set out in the relevant Fund Supplement, dividend distributions may be declared out of;

- (i) Net investment income which consists of interest and dividends.
- (ii) Realised profits on the disposal of investments less realised and unrealised losses (including fees and expenses). In the event that the realised profits on the disposal of investments less realised and unrealised losses are negative the Funds may still pay dividends out of net investment income and/or capital.
- (iii) Other funds (including capital) as may be lawfully distributed from the relevant Fund or Share Class of the relevant Fund.

Management fees and other fees, or a portion thereof, may be charged to capital and as a result capital may be eroded and income may be achieved by foregoing the potential for future capital growth. This cycle may continue until all capital is depleted. The rationale for charging to capital is to maximise the amount distributable to shareholders.

In the case of the Income II Classes, the Directors may, at their discretion, pay fees out of capital as well as take into account the yield differential between the relevant hedged Share Class and the base Share Class (which constitutes a distribution from capital). The yield differential can be positive or negative and is calculated taking into account the contribution of the Share Class hedging arising from the hedged Classes.

In the case of the M Retail Classes, the PIMCO Asia High Yield Bond Fund, Asia Strategic Interest Bond Fund, Euro Income Bond Fund, Euro Short-Term Fund, Income Fund, Low Duration Income Fund, Mortgage Opportunities Fund and US Short-Term Fund, except for the G Institutional, G Retail, E Class Income Q, E Class Income II Q and Investor Income A Classes (where applicable) of the aforementioned Funds, dividend distributions will be declared monthly and, depending on the shareholder's election, paid in cash or reinvested in additional shares monthly.

In the case of the Administrative Classes of Diversified Income Fund, BE Retail, BM Retail, BN Retail, M Retail and N Retail Share classes, dividend distributions will be declared monthly and depending upon the shareholder's election, paid in cash or reinvested in additional shares on a monthly basis.

In the case of the G Institutional, G Retail and Investor Income A Classes, dividend distributions will be declared annually and depending upon the shareholder's election, paid in cash or reinvested in additional shares on an annual basis

In the case of all other Funds with Income Class Shares, dividends distributions will be declared quarterly and, depending upon the shareholder's election, paid in cash or reinvested in additional shares after declaration.

Dividend distributions to holders of redeemable shares are classified as finance costs on the Statement of Operations. The income or gains allocated

to Accumulation Shares will neither be declared or distributed but the NAV per share of Accumulation Shares will be increased to take account of such income or gains. Dividend distributions not reinvested in shares will be paid to the shareholder by way of bank transfer. Any dividend distribution unclaimed after a period of six years from the date of declaration of such dividend distribution shall be forfeited and shall revert to the account of the relevant Fund. Shareholders can elect to reinvest dividend distributions in additional shares or have the dividend distributions paid in cash by ticking the appropriate box on the Application Form.

A portion of dividend distributions per the Statement of Operations was paid out of capital for the below Funds (amounts in thousands);

Fund	Year ended 31-Dec-2022	Year ended 31-Dec-2021
PIMCO Capital Securities Fund	\$ 30	\$ 0
PIMCO Climate Bond Fund	1	0
Diversified Income Fund	5,609	0
Diversified Income Duration Hedged Fund	524	605
Dynamic Bond Fund	237	0
Dynamic Multi-Asset Fund	€ 4,339	€ 6,563
Global Bond Fund	\$ 824	\$ 0
PIMCO Global Core Asset Allocation Fund	2,887	3,365
Global High Yield Bond Fund	124	0
Global Investment Grade Credit ESG Fund	0	15
Global Low Duration Real Return Fund	131	51
Global Real Return Fund	805	0
Income Fund	3,564	1,310
Low Average Duration Fund	19	0
Low Duration Opportunities Fund	644	0
Total Return Bond Fund	104	0
UK Corporate Bond Fund	£ 247	£ 0
UK Long Term Corporate Bond Fund	69	29

10. SOFT COMMISSIONS

The Company or its Investment Advisor may effect transactions on behalf of the Funds with or through the agency of execution brokers, which may, in addition to routine order execution, from time to time, provide to or procure for the Company or its delegates' goods, services or other benefits such as research and advisory services. The Company or its Investment Advisor may pay these brokers full-service brokerage rates part of which may be applied in the provision of permitted goods or services. Those Investment Advisors which are Markets in Financial Instruments Directive ("MiFID") investment firms or subject to equivalent regulatory provisions shall pay for any third party research which it purchases relating to the management of the assets of each Fund directly out of its own resources.

11. SEGREGATED LIABILITY

The Company is an umbrella type open-ended investment Company with variable capital and segregated liability between sub-funds. Accordingly, any liability on behalf of or attributable to any Fund of the Company shall be discharged solely out of the assets of that Fund, and neither the Company nor any Director, receiver, examiner, liquidator, provisional liquidator or other person shall apply, nor be obliged to apply, the assets of any such Fund in satisfaction of any liability incurred on behalf of or attributable to any other Fund of the Company, irrespective of when such liability was incurred.

12. CHANGES TO THE PROSPECTUS AND TO THE **MEMORANDUM AND ARTICLES OF ASSOCIATION**

On 07 February 2022, the Prospectus and Supplements for the Company were updated in accordance with the establishment of Back End Share Classes namely the "BE Retail", the "BN Retail" and the "BM Retail" (the "Back End Share Classes") in the Diversified Income Fund, the Dynamic Multi-Asset Fund, the Emerging Markets Bond Fund, the Global High Yield Bond Fund and the StocksPLUS™ Fund. Additionally, there will be no preliminary charge for GBP Share Classes in respect of each Fund and the amortisation period for the PIMCO Climate Bond Fund, the PIMCO ESG Income Fund and the Income Fund II was extended from one year to three years.

On 13 April 2022, in the Prospectus was updated to add a definition of "ESG Fixed Income Securities" to the ESG section which describes what constitutes a green bond, social bond, sustainable bond and sustainability linked bond. On the same date, the Supplement for the PIMCO Climate Bond Fund was updated in conjunction with the "ESG Fixed Income Securities" description to clarify that the Fund may also invest in any of the other types of ESG Fixed Income Securities, including those from the fossil fuel sector. For further details please see the Sustainable Finance Disclosure Regulation in the unaudited appendix. On the same date, the Supplements for the UK Sterling Long Average Duration Fund, US Small Cap StocksPLUS™ Fund, PIMCO RAE PLUS Emerging Markets Fund and PIMCO RAE PLUS Global Developed Fund were removed from the Prospectus following their formal revocation by the Central Bank.

On 13 April 2022, the Supplement for the PIMCO Emerging Markets Opportunities Fund was updated in respect of revised fee waiver disclosure, the Supplement for the Inflation Multi-Asset Fund was amended to reflect the change of name of the Fund from the "Inflation Strategy Fund" to the "Inflation Multi-Asset Fund" and the Supplement was also updated to amend the benchmark being used by the Fund and to reflect the reduction to the unified management fee being charged by the Fund across the various share classes. Disclosure concerning the Fund's investments in equity or equity-related securities was also amended. The Supplement for the PIMCO MLP & Energy Infrastructure Fund was amended to reflect the reduction to the management fee being charged by the Fund. In this regard, the E Class, the M Retail, G Retail and T Class each reduced by 31 bps and the management fee charged in respect of the R Class was reduced by 17 bps.

On 22 April 2022, the Supplements for the PIMCO European Short-Term Opportunities Fund and Euro Short-Term Fund were updated to reflect a change to the "Dealing Day" definition for the Funds from "any day on which banks are open for business in Munich, Germany..." to "any day on which banks are open for business in England...", following the relocation of certain portfolio managers in PIMCO Europe GmbH from Munich to its London branch.

On 01 June 2022, the Supplement for the PIMCO Emerging Markets Opportunities Fund was updated to include a fee waiver of 0.30% to be applied to the management fee for all Share Classes in the Fund (with the exception of the Z Share Class) from the 01 June 2022, and which will then be reduced to 0.15% on the 01 June 2023, and will fully expire on the 01 June 2024.

On 8 June 2022, the Low Duration Opportunities ESG Fund, Diversified Income ESG Fund and Emerging Local Bond ESG Fund were approved by the Central Bank and the Supplements for these Funds were incorporated into the consolidated Prospectus.

On 13 June 2022, the Supplements for the PIMCO ESG Income Fund, Global Bond ESG Fund, Emerging Markets Bond ESG Fund and Global Investment Grade Credit ESG Fund were updated in line with Article 8 classification requirements under SFDR and to clearly set out that the Funds shall promote environmental and social characteristics as part of their sustainable investing approach (noting that while sustainable investing shall continue to form part of the Funds' objective, they will not have "sustainable investments" as part of their respective investment objective). The Funds shall continue to invest in sustainable investments, apply an environmental and social exclusion screening and engage with issuers on their ESG practices. For further details please see the Sustainable Finance Disclosure Regulation in the unaudited appendix.

On 01 July 2022, the Supplement for the Euro Credit Fund was updated in respect of revised fee waiver disclosure. On the same date the Supplement for the Global LIBOR Plus Bond Fund was updated to reflect the change in Fund name to Low Duration Opportunities Fund and updated to amend the benchmark being used by the Fund. On the same date the Supplements for the PIMCO Capital Securities Fund, the Low Duration Opportunities ESG Fund, the PIMCO Credit Opportunities Bond Fund, the Dynamic Bond Fund, the Mortgage Opportunities Fund and the PIMCO TRENDS Managed Futures Strategy Fund were updated to amend the benchmark being used by the Funds.

On 22 July 2022, the Supplements for the Euro Short Term Fund, Global Real Return Fund and Global Low Duration Real Return Fund were updated to explicitly reference that they will promote environmental characteristics by implementing binding ESG criteria to the selection of underlying assets which sit alongside the Funds' current investment strategies. The Funds are classified as Article 8 Funds within the meaning of SFDR. On the same date, the Company's Promotion of Environmental Characteristics Supplement was

updated to further enhance the exclusion strategy and issuer engagement disclosure. In addition, the disclosure clarifies that taxonomy aligned investments shall be 0%. For further details please see the Sustainable Finance Disclosure Regulation in the unaudited appendix.

On 29 July 2022, the Supplement for the Strategic Income Fund was updated to amend the benchmark being used by the Fund, updated to reflect the amended proprietary equity income strategy being used by the Fund, updated to reflect the termination of the appointment of Research Affiliates, LLC and Parametric Portfolio Associates, LLC, updated for the amended threshold for investing in other income-producing investments, updated for the amendment in investments excluded from the Fund's emerging markets investment limit and also updated for a reduction in the management fee charged in respect of the share classes of the Fund.

On 08 August 2022, the Prospectus was updated in respect of amendments to the LIBOR disclosures, the taxation section, Directors' directorships, changes to the settlement deadlines for the receipt of subscription monies on certain share classes and the creation of a new share class type, F Class, in the Fund supplements for the Income Fund II and the Asia Strategic Interest Bond Fund, whose Supplements were also updated on the same date accordingly.

On 30 September 2022, the Supplements for the Asia Strategic Interest Bond Fund and the PIMCO Asia High Yield Bond Fund were updated to change the Dealing Deadline of the Funds from 9.00 a.m. Irish Time on each Dealing Day to 10.00 a.m. Irish Time on each Dealing Day.

On 30 November 2022, the Prospectus and relevant Supplements for the Company were updated in accordance with the Sustainable Finance Disclosure Regulation (EU) 2019/2088 ("SFDR") and noted by the Central Bank to add a pre-contractual Annex to each Article 8 and Article 9 Fund supplement. On the same date, the Promotion of Environmental Characteristics supplement and all references throughout the Prospectus were removed. The Taxonomy Regulation Alignment disclosure in each Article 9 and Article 8 plus Fund Supplement were also removed. On the same date, the Prospectus was updated with Principal Adverse Impacts website disclosure. For further details please see the Sustainable Finance Disclosure Regulation in the unaudited appendix.

The Memorandum and Articles of Association of the Company was amended during the financial year on 15 September 2022.

13. FEES AND EXPENSES

(a) Fees Payable to the Manager

Save for the BN Retail Shares, BM Retail Shares and BE Retail Shares as disclosed in the relevant Fund Supplement, the Unified Fee shall not exceed 2.50% per annum of the NAV of each Fund.

(b) Management Fee

The Manager, in respect of each Fund and as described in the Prospectus, provides or procures investment advisory, administration, depositary and other services in return for which each Fund pays a single Management Fee to the Manager. The Management Fee (as defined in the Prospectus) for each Fund is accrued on each Dealing Day (as defined in the relevant Fund's Supplement) and is payable monthly in arrears. The Manager may pay the Management Fee in full or in part to the Investment Advisors in order to pay for the investment advisory and other services provided by the Investment Advisors and in order for the Investment Advisors to pay for administration, depositary and other services procured for the Funds by the Manager.

The Management Fee for each class of each Fund (expressed as a per annum percentage of its NAV) is as follows:

	Inst'l, G Inst'l, Inv, Admin Classes (%)	H Inst'l (%)	BE Retail BM Retail BN Retail E Class, G Retail, M Retail, N Retail, T Class (%)	R Class (%)	W Class (%)

- (1) This figure takes account a fee waiver by the Manager at a rate of 0.05% in respect of the Investor Class from 31 May 2021 to 31 May 2023. The fee waiver will expire from 1 June 2023.
- For all Classes the figure takes account of a fee waiver by the Manager at the rate of 0.30% p.a. The fee waiver will reduce to 0.15% p.a on 1 June 2023. The fee waiver will expire from 1 June 2024 and may extend until such time as the Manager, on prior written notice to shareholders in the Fund, decides to discontinue or disapply this fee or to reduce it for any future period.
- The H Institutional Class rate takes into account a fee waiver by the Manager at the rate of 0.25% p.a. The fee waiver will extend until 30 June 2023 and will expire from 01 July 2023.
- The Institutional Class and the E Class rates take into account a fee waiver by the Manager at a rate of 0.11% p.a. from 31 May 2021. The fee waiver will expire from 19 January 2024.
- The Institutional and H Institutional Class rates take into account a fee waiver by the Manager of 0.14% p.a. The E Class rate takes account of a fee waiver by the Manager at the rate of 0.54% p.a. The fee waiver will expire from 18 January 2024.
- For all Classes the figure takes account of a fee waiver by the Manager at the rate of 0.04% p.a. The fee waiver expired on 01 January 2023.
- For all Classes the figure takes account of a fee waiver by the Manager at the rate of 0.05% p.a. The fee waiver for all classes was extended to 31 December 2022 and expired on 01 January 2023.
- The E Class, G Retail and M Retail rates takes into account a fee waiver by the Manager at the rate of 0.30% p.a. The fee waivers will extend until such time as the Manager, on prior written notice to shareholders in the Fund, decides to discontinue or disapply this fee or to reduce it for any future period.

The Diversified Income ESG Fund, Emerging Local Bond Fund ESG Fund and Low Duration Opportunities ESG Fund launched during the financial year.

The Management Fees for all Funds (except Inflation Multi-Asset Fund, PIMCO MLP & Energy Infrastructure Fund and Strategic Income Fund) were unchanged from 31 December 2021 with the exception of fee waiver amendments noted above.

The Management Fee attributable to the H Institutional, BE Retail, BM Retail, BN Retail, E Class, G Retail, M Retail, N Retail and T Class share classes is generally higher than the Management Fee attributable to the other share classes. From this higher fee the Manager may pay for the expense of distribution, intermediary and other services rendered to shareholders in these share classes of the Funds directly or indirectly by distributors or broker dealers, banks, financial intermediaries, or other intermediaries. Given the fixed nature of the Management Fee, the Manager, and not shareholders, takes the risk of any price increases in the cost of the services covered by the Management Fee and takes the risk of expense levels relating to such services increasing above the Management Fee as a result of

a decrease in net assets. Conversely, the Manager, and not shareholders, would benefit from any price decrease in the cost of services covered by the Management Fee, including decreased expense levels, as a percentage of net assets, resulting from an increase in net assets.

Due to the nature of the Z Class offering there is no Management Fee disclosed on the Statement of Operations (the Z Class is offered primarily for other Funds of the Company or for direct investment by institutional investors who have entered into an investment management or other agreement with the Investment Advisors or a PIMCO affiliate) and in an effort to avoid the duplication of fees, the Management Fee for the Z Class will be set at 0.00% per annum.

(c) Investment Advisory Services

On behalf of the Company, the Manager provides and/or procures investment advisory services. Such services include the investment and reinvestment of the assets of each Fund. The fees of the Investment Advisors (together with VAT, if any thereon) are paid by the Manager from the Management Fee.

(d) Administration, Depositary Services and Other Services

On behalf of the Company, the Manager provides and/or procures administration, depositary and other services. Such services include administration, transfer agency, fund accounting, depositary and sub-depositary in respect of each Fund. The fees and expenses of the Administrator and Depositary (together with VAT, if any thereon) are paid by the Manager from the Management Fee, or by the Investment Advisors.

On behalf of the Company, the Manager provides and/or procures certain other services. These may include listing broker services, paying agent and other local representative services, accounting, audit, legal and other professional advisor services, company secretarial services, printing, publishing and translation services, and the provision and co-ordination of certain supervisorial, administrative and shareholder services necessary for operation of the Funds. Fees and any ordinary expenses in relation to these services (together with VAT, if any thereon) are paid by the Manager, or by the Investment Advisors on behalf of the Manager, from the Management Fee.

The Funds will bear other expenses related to their operation that are not covered by the Management Fee which may vary and affect the total level of expenses within the Funds including, but not limited to, taxes and governmental fees, brokerage fees, commissions and other transaction expenses (including, but not limited to, fees and expenses related to due diligence on investments and potential investments and/or related to negotiations of such transactions), costs of borrowing money including interest expenses, establishment costs, extraordinary expenses (such as litigation and indemnification expenses) and fees and expenses of the Company's Independent Directors and their counsel.

The Company paid the Independent Directors fees of €180,000 during the financial year ended 31 December 2022 (31 December 2021: €180,000). In addition, each Independent Director is reimbursed for any reasonable out-of-pocket expenses. Non-Independent Directors are not entitled to separate remuneration for their directorship of the Funds. Directors' fees are a component of "Other expenses" on the Statement of Operations.

The following table sets out the fees the Company was charged by the statutory auditors during the financial years ended 31 December 2022 and 31 December 2021. The fees in the table below are exclusive of VAT.

Auditors' Remuneration	31-Dec-2022	31-Dec-2021
Audit of entity financial statements	€ 636,152	€ 567,652
Other assurance services	0	0
Tax advisory services	0	0
Other non-audit services	0	0

Service Fee The Service Fee which applies to the Investor Classes only is paid to the Manager and may be used to reimburse broker-dealers, financial intermediaries, or other intermediaries that provide services in connection with the distribution and marketing of shares and/or the provision of certain shareholder services or the administration of plans or programmes that use Fund shares as their funding medium, and to reimburse other related expenses (as defined in the relevant Fund's Supplement). The services are provided directly by the Manager or indirectly through broker-dealers, financial intermediaries, or other intermediaries to all shareholders of the

Investor Classes. The same services apply to all shareholders of the Investor Classes for the fees levied. These services may include responding to shareholder inquiries about the Funds and their performance; assisting shareholders with purchases, redemptions and exchanges of shares; maintaining individualised account information and providing account statements for shareholders; and maintaining other records relevant to a shareholder's investment in the Funds.

Plans or programmes that use Fund shares as their funding medium may include unit-linked insurance products and pension, retirement or savings plans maintained by employers. All shareholders in the Investor Classes will receive services pursuant to agreements entered into with financial intermediaries with whom those shareholders have a servicing relationship. The Service Fee is calculated on the basis of 0.35% per annum of the NAV of each Fund attributable to the Investor Classes. The Service Fees were unchanged from 31 December 2021. The Service Fee is paid out of the NAV attributable to the Investor Classes of the NAV of those Funds. The Service Fee for each Fund is accrued on each Dealing Day and is payable monthly in arrears. The Manager may retain for its own benefit in whole or in part any Service Fee not payable to broker dealers, financial intermediaries or other intermediaries.

Trail Fee The Trail Fee which applies to Administrative Classes is paid to the Distributor for personal services rendered to shareholders of the Funds and the maintenance of shareholder accounts, including compensation to, and expenses (including telephone and overhead expenses) of, financial consultants or other employees of participating or introducing brokers, certain banks and other financial intermediaries who assist in the processing of purchase or redemption requests or the processing of dividend payments, who provide information periodically to shareholders showing their positions in a Fund's shares, who forward communications from the Company to shareholders, who render ongoing advice concerning the suitability of particular investment opportunities offered by the Funds in light of the shareholders' needs, who respond to inquiries from shareholders relating to such services, or who train personnel in the provision of such services.

The services are provided directly by the Distributor or indirectly through broker-dealer, banks, financial intermediaries, or other intermediaries to all shareholders of Administrative Classes. The Trail Fee is calculated on the basis of 0.50% per annum of the NAV of each Fund, with the exception of the StocksPLUS™ Fund where calculated on the basis of 0.75% per annum, attributable to the Administrative Classes. The Trail Fee for each Fund is accrued on each Dealing Day and is payable monthly in arrears. The Distributor may retain for its own benefit in whole or in part any Trail Fee not payable to broker-dealers, banks, financial intermediaries or other intermediaries.

The Trail Fees were unchanged from 31 December 2021.

(e) Distribution Fee

The Distribution Fee which applies to T Class Shares, BN Retail Shares, BM Retail Shares and BE Retail Shares is paid to the Distributor for services rendered to shareholders of the Funds.

The services are provided directly by the Distributor or indirectly through broker-dealers, banks, financial intermediaries, or other intermediaries to all shareholders of T Class share. The Distribution Fee is calculated on the basis of 0.40% per annum of the NAV of each Fund attributable to the T Class share, with the exception to the PIMCO Asia High Yield Bond Fund, PIMCO Credit Opportunities Bond Fund, Dynamic Bond Fund, Euro Bond Fund, Global Bond Fund, Global Bond Ex-US Fund, Global Low Duration Real Return Fund, Global Real Return Fund, Low Duration Opportunities Fund, PIMCO MLP & Energy Infrastructure Fund and Total Return Bond Fund which attract a Distribution Fee of 0.30% per annum of the NAV of the Fund attributable to the T Class share.

In respect of the BE Retail, BM Retail and BN Retail share classes only, where disclosed in the relevant Supplement, the Distribution Fee may be up to 1% of the NAV and therefore the Unified Fee may exceed 2.50% of the NAV.

The Distributor Fee for each Fund is accrued on each Dealing Day and is payable monthly in arrears. The Distributor may retain for its own benefit in whole or in part any Distribution Fee not payable to broker-dealers, banks, financial intermediaries or other intermediaries.

(f) Expense Limitation (including Management Fee Waiver and Recoupment)

The Manager has agreed with the Company, pursuant to the Management Agreement between the Company and the Manager dated as of 28 January 1998, as amended, to manage total annual fund operating expenses for any Class of Fund, by waiving, reducing or reimbursing all or any portion of its Management Fee, to the extent that (and for such period of time that) such operating expenses would exceed, due to the payment of establishment costs and pro rata Directors' Fees, the sum of such Class of such Fund's Management Fee (prior to the application of any applicable Management Fee waiver), any Service or Trail Fees, as applicable, and other expenses borne by such Fund's share Class not covered by the Management Fee as described above (other than establishment costs and pro rata Directors' fees), plus 0.0049% per annum (calculated on a daily basis based on the NAV of the Fund).

In any month in which the Management Agreement is in effect, the Manager may recoup from a Fund any portion of the Management Fee waived, reduced or reimbursed pursuant to the Management Agreement (the "Reimbursement Amount") during the previous 36 months, provided that such amount paid to the Manager will not 1) exceed 0.0049% per annum of the Class of the applicable Fund's average net assets (calculated on a daily basis); 2) exceed the total Reimbursement Amount; 3) include any amounts previously reimbursed to the Manager; or 4) cause any Class of a Fund to maintain a net negative yield.

The Management Fee as disclosed in the Statement of Operations is recognised gross of the relevant management fee waiver where applicable. Management fee waivers are recognised within Reimbursement by Investment Advisors in the Statement of Operations. The Management Fee is paid to the Manager net of the waiver.

14. RELATED PARTY TRANSACTIONS

The Manager, Investment Advisors, Distributors and Directors are related parties. Fees payable to these parties are disclosed in Note 13, where applicable.

At 31 December 2022, the Manager held 1,786,291 (31 December 2021: 2,203,631) shares of the US Short-Term Fund.

Each of the Funds may invest in the other Funds of the Company and/or other collective investment schemes managed by the Investment Advisor or entities affiliated with the Investment Advisor ("Affiliated Fund").

The following Funds held cross umbrella investments for the financial year ended 31 December 2022 and 31 December 2021. These cross umbrella investments have been eliminated for the presentation purposes of the Company total of the Funds.
