# Executive summary

**Past performance does not predict future results.**

## Portfolio Performance

The GIS Inflation Multi-Asset Fund posted positive absolute returns of +5.73% and outperformed its benchmark (Institutional share class, net of fees) over the quarter. The Fund's overweight to U.S. interest rates, commodity exposure and bottom-up REIT strategies contributed to relative performance. The Fund's overweight to U.S. breakeven inflation, tactical underweight to gold and bottom-up EM FX strategies detracted.

### CONTRIBUTORS

- Overweight U.S. interest rates
- Bottom up commodity strategies and tactical underweight to commodities
- Bottom-up REIT strategies

### DETRACTORS

- Overweight to U.S. breakeven inflation
- Tactical underweight allocation to Gold
- Bottom-up EM FX strategies

## Portfolio strategy

ILBs: The Fund expresses a flat to modestly overweight duration position overall, sourced via U.S. interest rates. Our current duration positioning is based on the sentiment that most central banks have reached the peak in their current rate hiking cycles, with rate cuts expected to commence in mid-to-late 2024, if not earlier. We maintain an overweight to breakeven inflation in the U.S., as long-term inflation expectations are still well anchored despite inflation continuing to run above the Fed's target and core CPI remaining stubbornly high.

Commodities: We look to take advantage of structural sources of alpha in commodities and continue to implement structural index relative value trades.

Currency: Roughly benchmark-weight exposure to EM FX, but within currencies we seek alpha opportunities via an FX relative value carry strategy in DM and liquid EM FX.

REITs: Broadly in line with index exposure given recent repricing higher while continuing to be selective in single-name selection and tactical around prevailing valuations.

Gold: This position is dynamically adjusted based on valuation framework of gold relative to real yields.

# Fund specific risks

Risk	Risk Description
<b>Credit and Default Risk</b>	A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.
<b>Commodities Risk</b>	The value of commodity related investments may fluctuate substantially due to changes in supply and demand and/or due to political, economic or financial events.
<b>Currency Risk</b>	Changes in exchange rates may cause the value of investments to decrease or increase.
<b>Equity Risk</b>	The value of equity or equity related securities may be affected by stock market movements. Drivers of price fluctuations include general economic and political factors as well as industry or company specific factors.
<b>Derivatives and Counterparty Risk</b>	The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.
<b>Emerging Markets Risk</b>	Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses.
<b>Liquidity Risk</b>	Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.
<b>Interest Rate Risk</b>	Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).
<b>Mortgage Related and Other Asset Backed Securities Risks</b>	Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.
<b>MLP Tax Risk</b>	The fund may be required to file tax returns and pay income taxes which may have the effect of reducing the fund's return. While investments in MLPs may subject the fund to U.S. taxation and return filing obligations, it is not expected that investments in derivative instruments such as total return swaps on MLPs will result in these same tax consequences, although there can be no guarantee.

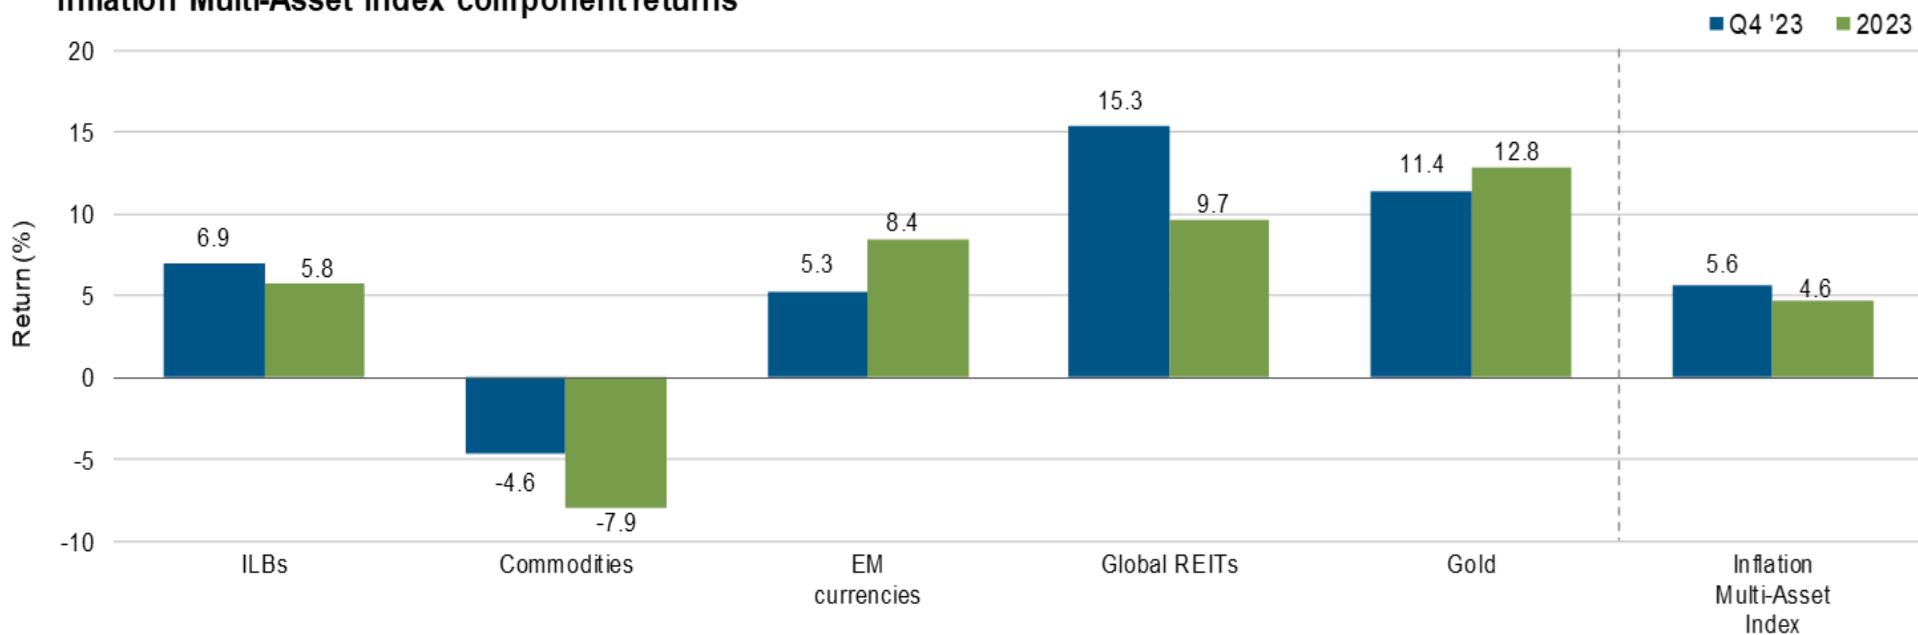

# Quarter in Review

## Real assets primarily delivered positive returns in Q4

The GIS Inflation Multi-Asset Index returned +5.63% for the quarter with four of the five underlying assets posting positive returns

- Global Inflation-Linked Bonds (ILBs) delivered positive returns as real yields rallied across the curve
- Broad commodities delivered losses overall amid weakening energy prices
- EM currencies posted positive returns given the dovish pivot from the Fed who signaled a rate cutting cycle likely ahead in 2024 revived appetite for risk assets
- Global REITs delivered positive returns over the quarter and outperformed the broader rally in global equities driven by optimism around interest rate cuts and easing inflation
- Gold prices surged over the quarter as real yields rallied amid cooling inflationary data and expectations that most central banks have completed their current rate hiking cycles

**Inflation Multi-Asset Index component returns**

# Market Summary

---

## Q4 '23: ILBs delivered positive returns as real rates rallied

The GIS Inflation Multi-Asset Fund posted positive absolute returns of +5.73% and outperformed its benchmark (Institutional share class, net of fees) over the quarter. The Fund's overweight to U.S. interest rates, commodity exposure and bottom-up REIT strategies contributed to relative performance. The Fund's overweight to U.S. breakeven inflation, tactical underweight to gold and bottom-up EM FX strategies detracted.

### Global Inflation-Linked Bonds (ILBs)

Global ILBs returned +6.90%, as represented by the Bloomberg Global Inflation Linked 1-30 Yrs Total Return Index Hedged USD. ILB markets delivered positive returns as real yields declined across countries and inflation expectations weakened. Eurozone breakevens declined across the curve given lower than expected headline and core inflation prints as well as weakening growth. Despite the ECB maintaining a hawkish posture after pausing in Q4, markets turn their expectations to cuts in 2024. Despite still remaining above U.S. and Eurozone headline inflation, cooling U.K. prices led to U.K. breakevens declining across the curve. The BoE kept its policy rate unchanged amid falling GDP and an easing labor market with payroll employment and vacancies falling.

### Commodities

Commodities posted losses in Q4, however, underlying sectors saw dispersion. Oil prices fell on demand concerns as well as production uptick and inventory builds in the US. Natural gas prices were lower due to elevated supply and mild weather. Base metals prices were mixed as Chinese demand uncertainties drove volatility in prices. Meanwhile, precious metals prices rose alongside a decline in real yields amid cooling inflation and a more dovish Fed.

### Global REITs / EM currencies

Global REITs delivered robust positive absolute returns over the quarter, and outperformed broader equities which also rallied. After equity prices dropped in Q3, performance rallied in Q4 amid a renewed risk appetite driven by optimism around interest rates cuts and easing inflationary pressures. The FTSE EPRA Nareit Developed Index returned +15.29% over the quarter, outperforming global equities.

Positive performance of EM currencies over the quarter was primarily accredited to the weakness of the U.S. dollar, whose appeal has been hurt relative to peers due to the anticipation of the end of the Fed's rate hiking cycle. EM FX performance was largely positive given high real rates and falling inflation in most EM countries. The Polish zloty was a notable performer over the quarter, appreciating significantly in response to the positive election outcome as well as contained inflation which has allowed the Central Bank to abandon its dovish approach.

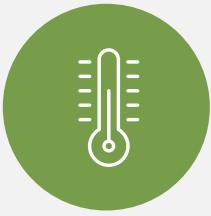

# Navigating the Descent: Four economic themes

**Peak inflation and rising unemployment consistent with rate cuts**

**Soft landings are possible, but risks remain**

**Markets already price a substantial cutting cycle**

**Global divergence in monetary policy**

# Portfolio Outlook

---

## Strategic outlook

Further disinflation and the potential for a faster cutting cycle should, in our view, raise the prospects for a soft landing. However, this is not to say that we believe that the path toward a soft landing is the only possible path. It is our view that the tighter-for-longer strategy that central banks have been communicating along with the strong possibility of stagnation in developed market supply and demand growth leave recession risks elevated.

## Key strategies

### Interest rates / breakeven inflation

The Fund expresses a flat to modestly overweight duration position overall, sourced via U.S. interest rates. Our current duration positioning is based on the sentiment that most central banks have reached the peak in their current rate hiking cycles, with rate cuts expected to commence in mid-to-late 2024, if not earlier. We continue to be selective within curves and securities depending on prevailing valuations and market events. We remain overweight to U.S. breakevens as long-term inflation expectations are still well anchored despite inflation continuing to run above the Fed's target and core CPI remaining stubbornly high. We maintain a modest overweight Japanese ILBs given they lagged global recover initially and provide asymmetric payoff opportunities. Maintain underweight in Eurozone breakevens as expectations are currently trading at rich levels relative to the U.S.

### Currency positioning

Roughly benchmark-weight exposure to EM FX, but within currencies we seek alpha opportunities via an FX relative value carry strategy in DM and liquid EM FX.

### Active commodity strategies

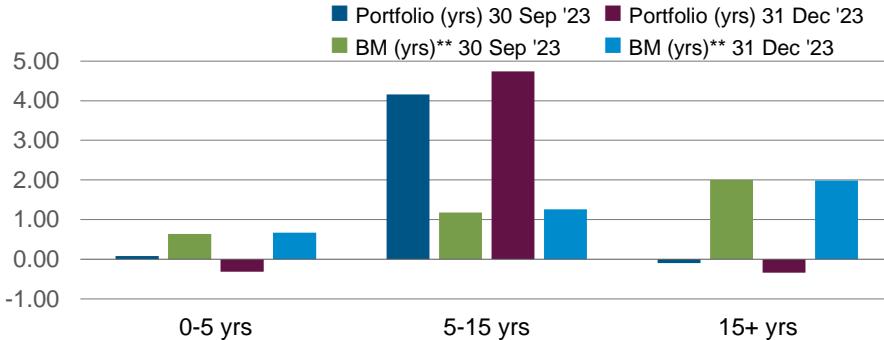

We are implementing a number of broad basket relative value views based on structural risk premia in commodities. We remain modestly underweight in overall commodity exposure, sourced by being slightly underweight to traditional commodities while also featuring a modest exposure to Carbon Allowances and Emission markets. Examples include being overweight commodities with low storage cost (for example soybeans) and being underweight commodities with relatively higher storage costs (for example corn, natural gas).

### Active REIT strategies

Overall, we focus on investing in names exhibiting above-average unlevered IRR profiles (volatility-adjusted). This framework factors in current valuations (i.e. NAV discounts), but also captures fundamental differences between property sectors and companies, such as cap-ex, general and administrative expenses, and near/intermediate/long-term growth profiles. Currently, sectors that look the most attractive on this metric include Gaming, Towers, Hotels, Single-Family Rentals, Apartments, and Manufactured Housing. In addition to attractive valuation, we favor the residential-related sectors driven by favorable demand/supply dynamics and low housing affordability, which should continue to benefit the rental market. We also see attractive opportunities in Data Centers and Towers, which should benefit from secular tailwinds from digitalization, data consumption, and AI.

## Marketing Communication

This is a marketing communication. This is not a contractually binding document and its issuance is not mandated under any law or regulation of the European Union or the United Kingdom. This marketing communication does not include sufficient detail to enable the recipient to make an informed investment decision. Please refer to the Prospectus of the UCITS and to the KIID/KID before making any final investment decisions.

## For professional use only

The services and products described in this communication are only available to professional clients as defined in the MiFID II Directive 2014/65/EU Annex II Handbook and its implementation of local rules and as defined in the Financial Conduct Authority's Handbook. This communication is not a public offer and individual investors should not rely on this document. Opinion and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. We believe the information provided here is reliable, but do not warrant its accuracy or completeness.

The information provided herein does not constitute an offer of the product incorporated in Ireland, in Switzerland pursuant to the Swiss Federal Law on Financial Services ("FinSA") and its implementing ordinance. This is solely an advertisement pursuant to FinSA and its implementing ordinance for the product. Swiss representative and paying agent : BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, 8002 Zurich, Switzerland. The prospectus, articles of association, Key Information Document(s) and annual and semi-annual financial reports of the product may be obtained free of charge from the Swiss representative.

## Additional Information/Documentation

A Prospectus is available for PIMCO Funds and UCITS Key Investor Information Documents (KIIDs) (for UK investors) and Packaged retail and insurance-based investment products (PRIIPS) key information document (KIDs) are available for each share class of each the sub-funds of the Company. The Company's Prospectus can be obtained from [www.fundinfo.com](http://www.fundinfo.com) and is available in English, French, German, Italian, Portuguese and Spanish. The KIIDs and KIDs can be obtained from [www.fundinfo.com](http://www.fundinfo.com) and are available in one of the official languages of each of the EU Member States into which each sub-fund has been notified for marketing under the Directive 2009/65/EC (the UCITS Directive). In addition, a summary of investor rights is available from [www.pimco.com](http://www.pimco.com). The summary is available in English. The sub-funds of the Company are currently notified for marketing into a number of EU Member States under the UCITS Directive. PIMCO Global Advisors (Ireland) Limited can terminate such notifications for any share class and/or sub-fund of the Company at any time using the process contained in Article 93a of the UCITS Directive.

## PERFORMANCE AND FEE

**Past performance is not a guarantee or a reliable indicator of future results.** The "gross of fees" performance figures, if included, are presented before management fees and custodial fees, but do reflect commissions, other expenses and reinvestment of earnings. The "net of fees" performance figures reflect the deduction of ongoing charges. All periods longer than one year are annualized.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

## Outlook

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions or are appropriate for all investors and each investor should evaluate their ability to invest for the long term, especially during periods of downturn in the market. Outlook and strategies are subject to change without notice.

**Portfolio structure** is subject to change without notice and may not be representative of current or future allocations.

Forecasts, estimates and certain information contained herein are based upon proprietary research and should not be interpreted as investment advice, as an offer or solicitation, nor as the purchase or sale of any financial instrument. Forecasts and estimates have certain inherent limitations, and unlike an actual performance record, do not reflect actual trading, liquidity constraints, fees, and/or other costs. In addition, references to future results should not be construed as an estimate or promise of results that a client portfolio may achieve.

## Benchmark

Unless referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark or index in this material is not used in the active management of the Fund, in particular for performance comparison purposes.

Where referenced in the prospectus and relevant key investor information document /Key Information Document a benchmark may be used as part of the active management of the Fund including, but not limited to, for duration measurement, as a benchmark which the Fund seeks to outperform, performance comparison purposes and/or relative VaR measurement. Any reference to an index or benchmark in this material, and which is not referenced in the prospectus and relevant key investor information document /Key Information Document, is purely for illustrative or informational purposes (such as to provide general financial information or market context) and is not for performance comparison purposes. Please contact your PIMCO representative for further details.

The fund is actively managed in reference to the 45% Bloomberg Global Inflation Linked 1-30yrs Index (USD hedged), 15% JPMorgan Emerging Local Markets Index Plus (USD Unhedged), 20% Bloomberg Commodity Total Return Index, 10% FTSE NAREIT Global Real Estate Developed Total Return Index (USD unhedged), and 10% Bloomberg Gold Subindex Total Return Index weighted (USD hedged) as further outlined in the prospectus and key investor information document /Key Information Document.

## Correlation

As outlined under "Benchmark", where [disclosed herein] and referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark may be used as part of the active management of the Fund. In such instances, certain of the Fund's securities may be components of and may have similar weightings to the benchmark and the Fund may from time to time show a high degree of correlation with the performance of any such benchmark. However the benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.

Investors should note that a Fund may from time to time show a high degree of correlation with the performance of one or more financial indices not referenced in the prospectus and relevant key investor information document /Key Information Document. Such correlation may be coincidental or may arise because any such financial index may be representative of the asset class, market sector or geographic location in which the Fund is invested or uses a similar investment methodology to that used in managing the Fund.

**ESG Category Article 6 Funds:** Article 6 funds do not have sustainable investment as its objective, nor do they promote environmental and/or social characteristics.

While such funds integrate sustainability risks into its investment policy (as further outlined in the Prospectus) and this integration process forms part of the investment level due diligence of the fund, ESG information is not the sole or primary consideration for any investment decision with respect to the fund. As the Fund is actively managed and does not promote environmental or social characteristics, the climate related holdings are not static and may vary considerably overtime.

## GIS Funds

PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. The information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law. The information contained in this communication is intended to supplement information contained in the prospectus for this Fund and must be read in conjunction therewith. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Fund's prospectus. Please read the prospectus carefully before you invest or send money. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Returns are net of fees and other expenses and include reinvestment of dividends. The performance data represents past performance and investment return and principal value will fluctuate so that the PIMCO **GIS Funds** shares, when redeemed, may be worth more or less than the original cost. Potential differences in performance figures are due to rounding. The Fund may invest in non-U.S. or non-Eurozone securities which involves potentially higher risks including non-U.S. or non-Euro currency fluctuations and political or economic uncertainty. For informational purposes only. Please note that not all Funds are registered for sale in every jurisdiction. Please contact PIMCO Europe Ltd for more information. For additional information and/or a copy of the Fund's prospectus, please contact the Administrator: State Street Fund Services (Ireland) Limited, Telephone +353-1-776-0142, Fax +353-1-562-5517. ©2024.

**Investment restrictions** —In accordance with the UCITS regulations and subject to any investment restrictions outlined in the Fund's prospectus, the Fund may invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by any of the following: OECD Governments (provided the relevant issues are investment grade), Government of Singapore, European Investment Bank, European Bank for Reconstruction and Development, International Finance Corporation, International Monetary Fund, Euratom, The Asian Development Bank, European Central Bank, Council of Europe, Eurofima, African Development Bank, International Bank for Reconstruction and Development (The World Bank), The Inter American Development Bank, European Union, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Student Loan Marketing Association (Sallie Mae), Federal Home Loan Bank, Federal Farm Credit Bank, Tennessee Valley Authority, Straight-A Funding LLC, Government of the People's Republic of China, Government of Brazil (provided the issues are of investment grade), Government of India (provided the issues are of investment grade).

# Important Disclosures

---

Acronyms and definitions of investment terms used throughout the report:

**Alpha** is a measure of performance on a risk-adjusted basis calculated by comparing the volatility (price risk) of a portfolio vs. its risk-adjusted performance to a benchmark index; the excess return relative to the benchmark is alpha.

**Average coupon** is the average of the coupon payments of the underlying bonds within the portfolio.

**Average effective maturity** is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

**"Bend-but-not-break"** refers to credits that PIMCO would not expect to default in a credit-stressed environment.

**Beta** is a measure of price sensitivity to market movements. Market beta is 1.

**Break-even inflation rate** (or expectation) is a market-based measure of expected inflation or the difference between the yield of a nominal and an inflation-linked bond of the same maturity.

**Carry** is the rate of interest earned by holding the respective securities.

The terms **"cheap"** and **"rich"** as used herein generally refer to a security or asset class that is deemed to be substantially under- or overpriced compared to both its historical average as well as to the investment manager's future expectations. There is no guarantee of future results or that a security's valuation will ensure a profit or protect against a loss.

**CPI** is the Consumer Price Index.

The **credit quality** of a particular security or group of securities does not ensure the stability or safety of an overall portfolio. The quality ratings of individual issues/issuers are provided to indicate the credit-worthiness of such issues/issuer and generally range from AAA, Aaa, or AAA (highest) to D, C, or D (lowest) for S&P, Moody's, and Fitch respectively.

**Dividend yield** is represented by the weighted average coupon divided by the weighted average price.

**Duration** is the measure of a bond's price sensitivity to interest rates and is expressed in years.

**Effective duration** is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.

**Forward curve** is a function graph that defines the prices at which a contract for future delivery or payment can be concluded today.

**Fallen angel** is a bond that was initially given an investment grade rating but has since been reduced to below investment grade status.

**GFC** is the Global Financial Crisis.

**Information ratio** is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns.

**Like-duration Securities** are calculated by the index provider by comparing the index return to a hypothetical matched position in the security.

**LNG** is Liquefied Natural Gas.

The **Option Adjusted Spread (OAS)** measures the spread over a variety of possible interest rate paths. A security's OAS is the average return an investor will earn over Treasury returns, taking all possible future interest rate scenarios into account. The OAS is the net spread over the swap curve that will on average be earned if the security is held to maturity.

**Rising star** is the term given to a bond that was rated high yield but has since been upgraded to investment grade.

**"Risk assets"** are any financial security or instrument that are likely to fluctuate in price.

**Risk premia** is the return in excess of the risk-free rate of return an investment is expected to yield.

**Roll yield** is the yield that a futures investor captures as their long position in a futures contract converges to the spot price.

**"Safe haven"** is an investment that is expected to retain or increase in value during times of market turbulence.

**"Safe Spread"** is defined as sectors that we believe are most likely to withstand the vicissitudes of a wide range of possible economic scenarios. All investments contain risk and may lose value.

The **SEC yield** is an annualized yield based on the most recent 30 day period. The subsidized yield includes contractual expense reimbursements and it would be lower without those reimbursements. The **Unsubsidized 30 day SEC Yield** excludes contractual expense reimbursements.

**Tracking error** measures the dispersion or volatility of excess returns relative to a benchmark.

To relate the price sensitivity of ILBs to changes in nominal yields, yield beta is applied to nominal changes to arrive at a price sensitivity of ILBs to changes in nominal rates. A **yield beta** of 0.90 implies that if nominal yields move 100 basis points, real yields will move 90 basis points. ILBs with long maturity may respond differently to changes in nominal rates than shorter maturity ILBs.

The distribution yield for monthly paying Funds is calculated by annualizing actual dividends distributed for the monthly period ended on the date shown and dividing by the net asset value on the last business day for the same period. The distribution yield for quarterly paying Funds is calculated by taking the average of the prior four quarterly distribution yields. The quarterly distribution yields are calculated by annualizing actual dividends distributed for the quarterly period ended on the most recent quarterly distribution date and dividing by the net asset value for the same date. The yield does not include long- or short-term capital gains distributions.
